Usaf Waiver Guide Medications:

Handbook of Aviation Neuropsychology Robert Bor, Carina Eriksen, Randy J. Georgemiller, Alastair L. Gray, 2024-11-11

The field of aviation neuropsychology helps us to understand and improve human performance and safety in the aerospace industry both for the estimated 300 000 commercial pilots and the 4 5 billion passengers they transport every year This handbook brings together a group of internationally renown academic and industry experts to provide a comprehensive overview of the background goals principles challenges and associated practice skills and research themes of aviation neuropsychology After an introduction to the history and development of aviation psychology additional sections focus on the importance of prevention and resilience to enhance airline workers cognitive and mental functioning to reduce the risk of human errors and accidents as well as the different aspects of assessment including pilot medical certification neuropsychological testing and cultural considerations Additional chapters explore how we can learn from past errors and build on existing strengths Finally special aspects are examined including the role of different common conditions e g neurological and psychological disorders and report writing in aviation Readers will find the book full of unique insights theory and research giving them a comprehensive overview of the field While the book is designed primarily for health care professionals neuropsychologists clinical psychologists aviation psychologists aviation medical examiners neurologists and flight safety specialists it will be of interest to other professionals inside and outside of aviation including professionals in other safety critical settings or researchers looking to improve safety in the aviation industry

Aeromedical Psychology

Carrie H. Kennedy, Gary G. Kay, 2017-11-01 Aeromedical psychology is that branch of psychology pertaining to the assessment selection and evaluation of aviation personnel This book Aeromedical Psychology is designed to provide the means for a variety of clinicians to carry out sound assessment and selection procedures perform informed evaluations and make subsequent recommendations regarding flight status and treatment strategies geared to the aviation environment To facilitate a dynamic understanding of the field the book emphasizes an integration of applications and theory case examples and research The book is divided into three parts The first presents assessment and selection procedures for aviation personnel i e air traffic controllers flight officers and pilots and astronauts and the many ways in which both psychologists and psychiatrists are involved in these roles In the second part the waiver standards put forth by both the FAA and the various branches of the military are presented as well as the waiver decision process Clinical issues unique to aviation notably fear of flying motivation to fly and airsickness are addressed as well as possible courses of intervention treatment and disposition In the final part more specialized issues pertaining to aeromedical psychology are dealt with namely the psychopharmacological research and regulations applicable to recreational pilots and aviation personnel managing the aftermath of aviation mishaps and the psychologist s role in accident investigations
