gravitational waves carry energy from the collision or explosion of stars Dying binary stars for example rotate faster and faster around each other until they merge emitting a burst of gravitational waves It is only with the development of extraordinarily sensitive highly sophisticated detectors that physicists can now confirm Einstein's prediction This is the story that Collins tells Collins a sociologist of science who has been embedded in the gravitational wave community since 1972 traces the detection the analysis the confirmation and the public presentation and the reception of the discovery from the first email to the final published paper and the response of professionals and the public Collins shows that science today is collaborative far flung with the physical location of the participants hardly mattering and sometimes secretive but still one of the few institutions that has integrity built into it
