Management Engineering Training Activity, 1983 **The NIAM Information Analysis Method** J.J.V.R. Wintraecken, 2012-12-06 About information analysis Everywhere people are working they are communicating or exchanging information about their work Unless they come to reasonable agreements about this communication i.e. agreements describing the language of their communication so that they can understand each other's information sooner or later there will be such a Tower of Babel that their goal of communication will be doomed to failure There are a lot of places where some of the communication between people working together is being carried out via an information system In these cases too a clear agreement about communication must be made so that people communicating via an information system can understand each other at all times In such an agreement it is determined which data may be exchanged with the information system and the meaning everyone should assign to that data For communication taking place via an information system such an agreement is called a grammar or a conceptual scheme of this information system Information analysis is that field and also that phase of development of an information system in which the grammar or the conceptual scheme of the information system is determined The grammar or the conceptual scheme is an essential part of the specifications of present day information systems
