## What Is Nfsas:

Corrupted Jonathan D Jansen, 2023-02-01 In South African higher education the images of dysfunction are everywhere Student protests Violence Police presence Rubber or real bullets Class disruptions Burning tyres Damaged buildings Injury and sometimes death Reports of wholesale corruption Year after year often in the same set of universities the problem of routine instability seems insoluble The financial academic and reputational costs of ongoing dysfunction are high especially for those universities caught up in the never ending struggle to overcome apartheid legacies Any number of explanations have been ventured including a lack of resources shortage of capacity rural location corrupt officials and endemic conflict Corrupted takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities At the heart of the problem lies the vexed issue of resources or more pertinently the relationship between resources and power who gets what and why Whatever else it aspires to be commonly a place of teaching learning research and public duty a university in an impoverished community is also a rich concentration of resources around which corrupt staff students and those outside of campus all vie for access Taking a political economic approach Jonathan Jansen describes the daily struggle for institutional resources and offers accessible sensible insights He argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Rather durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly

**Transforming Universities in South Africa** ,2020-08-31 The idea of transformation in higher education underpins all policy documents academic literature and on going debates in South Africa Transforming Universities in South Africa Pathways to Higher Education Reform responds to the pressing need to comprehensively review the post apartheid experience and assess where South Africa s higher education stands across the continent and globally particularly within the

country's efforts to overcome decades of socio economic imbalances. It addresses the question of whether South Africa's transformation strategy from apartheid to democracy was simply a symbolic new flag raising and new anthem singing exercise reflecting a transition akin to those limited decolonization projects elsewhere in the world or whether something more fundamental was possible and was achieved with political and policy implications for other countries in Africa and globally. This volume's ultimate purpose is to provide a basis for imagining new futures in which South Africa's higher education in the context of Africa and the global world takes centre stage. *The Youth Dividend* Jan H. ### **Sustaining Higher Education Through Resource Allocation, Learning Design Models, and Academic**

**Development** Makua, Manyane, Akinlolu, Mariam, 2023-07-24 Conversations, debates and policies toward higher education remain in an uncritical mode of normality on issues such as inclusion, exclusion and equity. In addition, the onset of the COVID 19 pandemic has starkly highlighted the fragility of the higher education system and has raised salient questions related to inclusivity and quality in all aspects. *Sustaining Higher Education Through Resource Allocation, Learning Design Models, and Academic Development* fills a gap in the existing literature by introducing current practices and procedures in the face of the new normal as they affect the higher education sector. The book also addresses the various issues of current interest in the higher education sector relative to teaching and learning, student support, staff development, curriculum development, educational technologies, learning design models and resource allocation. Covering key topics such as student engagement, assessment practices and academic development, this premier reference source is ideal for administrators, researchers, scholars, academicians, practitioners, instructors and students. **Finding a moral compass for South Africa** JM

Vorster, 2023-07-31 The research question of this book reads: Can South Africans amidst all the contemporary distrust in political leadership and moral decay find a moral compass that could lead them to a humane society of mutual trust, respect for each other, a flourishing life and a bright future for future generations? This book presents new perspectives on the psychopathology created by colonisation, the failures of the post 1994 dispensation regarding reconciliation, transformation, justice, distorted family life, violence, unity in diversity as well as moral leadership and agency and indifference to a future of hope. It proposes a new moral compass that can lead South Africa out of the abyss. *Annual Report* Council on Higher Education (South Africa), 2000

**Technical and Vocational Teaching in South Africa** Reuben Dlamini, Ian Moll, Vasidevan Naiker, 2024-07-23 This book unpacks the notion of pedagogy in South African technical and vocational education and training (TVET), enhancing the importance of the psychological dimension of learning. The book is premised on the idea that as stories of actual grounded teaching and learning practices emerge from South African colleges, a coherent picture of pedagogy can be established. With chapters by practising TVET educators writing about their own work, the volume seeks to reconceptualise vocational teaching and learning processes with diversity and inclusivity in mind. The book will be of interest to students and scholars of TVET and education in South Africa as well as South African college practitioners and

**Reflections of South African University Leaders: 1981 to 2014** Council on Higher Education,2016-03-17 Much has been written about the ever growing demands on university leadership worldwide in the face of increasingly complex changes and challenges from within the academy and beyond However as we are reminded by Johan Muller in the Introduction to this book there are particular features of time and place that also throw up unique problems It is precisely time and place that make this set of reflections by university leaders quite remarkable and distinguishes it from the many biographies to be found in the literature on higher education leadership In the main this collection spans two decades the 1990s and 2000s of unprecedented levels of change in South African higher education Leaders in universities as well as those responsible for higher education policy in the government and associated statutory bodies had no neat script to work off nor manuals or prescripts of good leadership or practice Instead there was palpable excitement about collectively imagining and nurturing a new post apartheid higher education system which would contribute to the social and economic development needs of the country the deepening of democracy and which would also be globally relevant Most reflections touch on the coalface of leadership which is the face to face interactional dimension dealing with staff with students with council chairs What comes through clearly is the importance of what are sometimes called people skills In these accounts this is not simply presented as a human relations aptitude for a number of reasons first of which is the special nature of universities and their occupants More than one points out the special challenge of managing the talented people that are academics and their inbuilt distaste for bureaucracy their reluctance to be managed or told what to do The message here is consistently one of needing to be completely open with academics the importance of maintaining the distinction between collegial and executive management avoiding managerialism and the critical importance of winning and holding their trust The inspiration for this collection arose in late 2013 in the Council on Higher Education s CHE Monitoring and Evaluation Directorate the directorate responsible for conducting research on the higher education landscape and monitoring the state of the sector They noted that conditions besetting universities had grown increasingly complex both globally but more especially locally and the question arose how had this altered the challenges to university leadership over the period between the new political dispensation and the second decade of the new millennium More particularly how had leaders with a proven track record of visionary and strong leadership during this period faced these challenges How did they see the main changes that needed dealing with What challenges did these changes pose and how were they successfully overcome What did they think looking back were the main constituents of successful leadership and management What wisdom could be distilled for posterity The Directorate decided to invite a range of vice chancellors and senior academic leaders who had completed their terms of office to contribute to a project that set out to gather such reflections and compile them into a publication     *Youth Exclusion and Empowerment in the Contemporary Global Order* Oláyínká Àkànlé,2022-08-10 The first volume of Youth

Exclusion and Empowerment in the Contemporary Global Order focuses particularly on contexts of economic educational and governance concerns that confront youths globally the complex consequences of these issues their experience of exclusion and sustainable pathways forward
