

A life without internet

Internet has become an indispensability. Internet and computers have already taken over each and every field. Tell me an area or sphere where internet and computers are not being used! Education, industry, finance, defense, teaching, learning, research, medicine, accounting, entertainment, internet, online teaching, telecommunication, media, and space research and exploration. It is internet and computer everywhere. The modern world will look void without internet and computers. Internet and computers have created such an order in every field. They are so adroitly efficient in data storing and handling. They have man's life much more organized, systematic, simple, colorful, and awesomely efficient.

Imagine if internet gets disrupted for a day or two, what will happen? I think all walks of life will be affected. Banking, ATM's, communication of all types, TV and Media World, websites, online transactions, etc. will be hanged and almost life will come to a standstill.

Internet in the modern times has become a necessity, so living without it even for a day will cause lots of problems to everyone.
