How and Why Does Spatial-Hearing Ability Differ among Listeners? What Is the Role of Learning and Multisensory Interactions? Guillaume Andéol, Brian D. Simpson, Ewan A. Macpherson, 2016-08-29 Spatial hearing ability has been found to vary widely across listeners A survey of the existing auditory space perception literature suggests that three main types of factors may account for this variability physical factors e g acoustical characteristics related to sound localization cues perceptual factors e g sensory cognitive processing perceptual learning multisensory interactions and methodological factors e g differences in stimulus presentation methods across studies However the extent to which these and perhaps other still unidentified factors actually contribute to the observed variability in spatial hearing across individuals with normal hearing or within special populations e g hearing impaired listeners remains largely unknown Likewise the role of perceptual learning and multisensory interactions in the emergence of a multimodal but unified representation of auditory space is still an active topic of research A better characterization and understanding of the determinants of inter individual variability in spatial hearing and of its relationship with perceptual learning and multisensory interactions would have numerous benefits In particular it would enhance the design of rehabilitative devices and of human machine interfaces involving auditory or multimodal space perception such as virtual auditory multimodal displays in aeronautics or navigational aids for the visually impaired For this Research Topic we have considered manuscripts that present new methods or review existing methods for the study of inter individual differences present new data or review existing data concerning acoustical features relevant for explaining inter individual differences in sound localization performance present new or review existing psychophysical or neurophysiological findings concerning spatial hearing and or auditory perceptual learning and or multisensory interactions in humans normal or impaired young or older listeners or other species discuss the influence of inter individual differences on the design and use of assistive listening devices rehabilitation or human machine interfaces involving spatial hearing or multimodal perception of space ergonomics

Places of Excellence

Martin Tröndle, Johanna Schindler, 2021-04-19 This book investigates how excellence and reputability are formed performed and perceived at well renowned international higher education institutions Along six detailed ethnographic case descriptions including University of Warwick Goldsmiths New York University School of the Art Institute Chicago Ohio State University and HEC Montr al it asks how master s programs in arts management and cultural policy achieved reputability and how this affects the everyday academic live A cross case analysis revealed a set of overall drivers that seem to have a great impact on the reputation of the studied programs By focusing on the design and content of the teaching environments as well as on motivational emotional and social aspects of the learning situation at these six higher education institutions the book offers a holistic understanding of reputability and excellence Dealing with Mission Drift in Parachurch Agencies Israel K.

Kombaté, 2025-01-31 Mission drift is a constant threat to any parachurch organization trying to remain mission true and holistically relevant in this post Christian society Defining it as a phenomenon in which Christian based mission agencies stray from their God given vision and identity towards socio humanitarian objectives this study considers this in light of Jesus s own holistic mission exemplified in Matthew 9 35 38 and Luke 4 18 19 This insightful investigation into seven Christian NGOs and NPOs seeks to reveal the underlying reasons and motivations for moving towards mission drift Presenting an exegetical study of the ministry of Jesus Dr Kombat offers a developed and nuanced understanding of the challenging forces that contribute to mission drift and puts forward tools to minimize its risk A must read for missionaries pastors and leaders in parachurch organizations endeavouring to retain a strong biblically grounded commitment to following holistic mission

General Knowledge Compendium for IAS Prelims General Studies Paper 1 & State PSC Exams 2nd Edition Disha Experts,2020-02-04 Fluid Physiology

Thomas Woodcock,2019-10-23 This book is essential reading for medical or veterinary practitioners who need to understand the new fluid physiology and to apply it to the safe care of patients The Starling principle is one of medicine s most important concepts and originates from Ernest Starling s laboratory research 120 years ago However inappropriate fluid therapy is now recognised as harming and even killing thousands of patients every year In 2004 a landmark study was published which confirmed the hypotheses put forward by Sheldon Weinbaum and Charles Michel among other physiologists that in most tissues and in most situations capillaries filter fluid to the interstitium but do not reabsorb it This book draws together for the first time the evolving science of the steady state Starling principle and the clinical evidence that reveals its applicability to safer patient care It is a thorough re appraisal of the basics of fluid therapy The mantra of colloid boluses for plasma volume resuscitation and colloid free isotonic salt solution for extracellular fluid volume does not explain observations from blinded clinical trials and the expectation of benefit for resuscitation with colloids particularly in respect of oedema has not materialised Now that there is consensus that colloid volume therapy should not be used in critically ill patients there is a pressing need for a new paradigm for fluid therapy This book proposes an improved paradigm that takes into consideration the Starling principle which has been neglected by clinicians and revised by physiologists in recent years It retires the view

of colloids as preferred plasma substitutes and focuses instead on the central volume of distribution of an infused fluid its rate of distribution to a peripheral volume and its rate of excretion In short it emphasises volume kinetics The Indian Journal of Agricultural Sciences ,2014-07
