Bruce Johnstone, Pamela N. Marcucci, 2010-06-07 No issue in higher education is as salient or as controversial as finance As demand for higher education around the world grows so do the costs associated with it especially as governments shoulder less of the burden Tuition fees rise and student loan debt grows Who pays for these surging costs Who should pay D Bruce Johnstone and Pamela N Marcucci examine the universal phenomenon of cost sharing in higher education where financial responsibility shifts from governments and taxpayers to students and families They find that growing costs for education far outpace public revenue streams that once supported it Even with financial aid and scholarships defraying some of these costs students are responsible for a greater share of the cost of higher education Featuring comprehensive economic and policy data the authors international comparative approach shows how economically

diverse countries all face similar cost sharing challenges So who should pay for higher education While cost sharing is both politically and ideologically debated Johnstone and Marcucci contend that for almost all countries it is imperative for the financial health of colleges and universities bringing better efficiency equity and responsiveness Financing Higher Education Worldwide combines sophisticated economic explanations with sensitive political and cultural analyses of the financial pressures facing higher education throughout the world **Welcome to the Real World!** Alex

Utilisation of South African Research on Higher Education Jan Botha ,Gabriele Vilyte ,2021-10-26 The relationship between research on the one hand and policy practice on the other hand is complicated and collaboration between scholars in research on higher education RHE and institutional research IR practitioners is often lacking This book marks a collaborative effort of a diverse range of South African RHE and IR scholars and asks the overarching questions What do we know about the utilisation of South African research on higher education SARHE and its subset of research known as Institutional Research How and by whom is this research used The book begins by looking at the historical underpinnings of SARHE and delineating the shape and size of this body of research This is followed by a series of case studies on South African Higher Education institutions and governmental bodies investigating how when and by whom are research on higher education and institutional research used in the decision making of these organisations This book is the first of its kind in South Africa and sets out to lay the groundwork for further research into the use uptake and utilisation of RHE and IR in this country

The Youth Dividend Jan H.

Hofmeyr,2012 **Transforming Transformation in Research and Teaching at South African Universities** Rob Pattman,2018-12-20 What is transformation in contemporary South African higher education How can it be facilitated through research and pedagogic practices These questions are addressed in this edited collection by established academics and emerging research students from nine South African universities The chapters give us access to students worlds how they construct experience and navigate their complex spheres on and off campus **Black Tax** Niq Mhlongo,2019-09-12 The real significance of this book lies in the fact that it tells us more about the everyday life of black South Africans It delves into the essence of black family life and the secret anguish of family members who often battle to cope Niq Mhlongo A secret torment for some a proud responsibility for others black tax is a daily reality for thousands of black South Africans In this thought provoking and moving anthology a provocative range of voices share their deeply personal stories With the majority of black South Africans still living in poverty today many black middle class households are connected to working class or jobless homes Some believe supporting family members is an undeniable part of African culture and question whether it should even be labelled as a kind of tax Others point to the financial pressure it places on black students and professionals who as a consequence struggle to build their own wealth Many feel they are taking over what is essentially a government responsibility The contributions also investigate the historical roots of black tax the concept of the black family and the black middle class In giving voice to so many different perspectives Black Tax hopes to start a dialogue on this widespread social phenomenon Discrimination in an Unequal World Miguel Angel Centeno,Katherine S. Newman,2010-09 Is globalization making our world more equal or less Proponents of globalization argue that it is helping and that in a competitive world no one can afford to discriminate except on the basis of skills Opponents counter that globalization does nothing but provide a meritocratic patina on a consistently unequal distribution of opportunity Yet despite the often deafening volume of the debate there is surprisingly little empirical work available on the extent to which the process of globalization over the past quarter century has had any effect on discrimination Tackling this challenge Discrimination in an Unequal World explores the relationship between discrimination and unequal outcomes in the appropriate geographical and historical context Noting how each society tends to see its particular version of discrimination as universal and obvious the editors expand their set of cases to include a broad variety of social relations and practices However since methods differ and are often designed for particular national circumstances they set the much more ambitious and practical goal of establishing a base with which different forms of discrimination across the world can be compared Derived from a broad array of methods the book draws many important lessons on the new means by which the world creates social hierarchies the democratization of inequality and the disappearance of traditional categories **The Next Twenty-five Years** David Lee Featherman,Marvin Krislov,Martin Hall,2009-12-18 A must read for anyone who cares about the future of higher education in diverse democracies **Students' participation in university governance in South Africa** Vuyo Mthethwa,2023-03-01 The

purpose of this book is to examine the academic experiences of students who participated in university governance at South African universities. Scrutiny is placed on the alignment of student representative council constitutions and university statutes with the actual experiences students had in discharging their roles in governance and in the way this impacted their academic progress. Through a multi-site case study design, semi-structured interviews were conducted with members of the student representative council who participated in university governance and supported by document analysis and observations to generate the data. The study adopted Tinto's Integration Theory and Astin's Theory of Involvement as the two frameworks are based on the relationship between students' extra-curricular activity and their academic experiences. The study invokes a greater awareness of students as major stakeholders in governance and informs policies and practices that may better serve students' academic experiences. The study will contribute to the understanding of cooperative governance principles while drawing from the perspective of the students on their understanding, limitations and challenges in discharging their roles in university governance.
