

## **Microbiology Unknown Identification**

Your unknown experiment this semester will be performed on Connect. You will be walking through the identification of 10 different microbes. During the process, you are going to be using several different microbiological media types and biochemical tests. In addition to completing each of the 10 unknown exercises on Connect (each one should take 15-20 minutes tops) I would like you to provide information about the following biochemical tests. Note – not all tests are performed with each unknown activity on Connect. By completing all 10 unknown activities, you should have performed each of the tests below. You may notice some overlap with this and your media assignment – that will be a good reference for you.

1. Catalase
2. Oxidase
3. Nitrate broth
4. Citrate agar
5. Glucose Broth

### **For each of the above items:**

1. Write out the procedure for inoculation, describe incubation, and indicate what occurs after incubation. (Are extra reagents needed?) \*If no incubation is needed make sure you indicate this.
2. Describe how to determine if a result is positive or negative.
