Available online at: <https://ufv.ca/asc/student-resources/>

Students are often required to summarize scholarly journal articles or to base reviews or critiques or research papers on scholarly sources, all of which require acts of summary. Summary is one of the most prominent features of academic writing because it gives writers access to the ideas of others. You will find that most of the academic writing you do will respond to or be based on the ideas – the writing – of others.

The guide that follows will introduce you to scholarly summary and describe it as a process.

Scholarly Journal Articles, Research Situations, and Knowledge

Scholarly journals publish research by professional researchers who often study and teach in universities or other research institutions. Before scholarly articles are published, they are reviewed by researchers who share the research concerns of your article's author. This means that before an article can be published in a scholarly journal it has to be considered worthy of publication because it meets the scholarly goal of generating new knowledge about a specific topic. To be published, the article must have taken into account most of what is already known about a topic. So current research articles are useful because they incorporate (sometimes explicitly) what is understood about a research question.

Summary Reports; Summary Does not Evaluate

The goal of your summary, then, is to *report in a brief and yet accurate manner the main gists* ("gist" refers to the main or essential parts of the article, its main line or lines of reasoning) of the article. The goal of summary is **not to offer an evaluation or opinion** of the original article, but, rather, to report the writer's main ideas and findings. This means that you will need to *indicate to your reader the writer's main point or points or purpose for writing*. You will also need to *point out how the writer develops or supports his or her main point*.

Since one of the goals of summary is to present a far more concise version than the original, it is **not** usual to include direct quotes from the original or even to include very many specific, concrete details from the original, though you may need to include one or two brief examples that illustrate the writer's main point or points. Think of a summary as the child of the original document: fully formed and able to make sense and stand on its own, a new text, not exactly the same as its original, but bearing the features of its parental origins, so much so that anyone who sees the summary might be heard to remark, "Oh, you have your parents' main features; you even sound like your parents, but you are much shorter!"
