The book challenges an individualised notion of employability instead locating employability issues in social and economic conditions and argues that employability choices cannot be divorced from inequality. Qualitative and quantitative data from multiple case study universities in South Africa are used to explore the perceptions and experiences of diverse students, lecturers, support officers and employers regarding what each university is doing or should be doing to enhance graduate economic opportunities and contribute to inclusive development. The book tackles the issue of what ought to be done for African universities to maintain a structure and identity that ensures their relevance in Africa's development through generating and transforming knowledge into actions for the common good. It engages issues within the context of how post-colonial transformative obligations have been managed in light of the prevalent epistemological and pedagogical underpinnings that form the foundations of these universities as they seek to break from the clutches of colonial legacies. This book further highlights an urgent need to do away with silos and embrace a multidisciplinary, interdisciplinary, transdisciplinary and cross-disciplinary dialogical approach towards knowledge generation. Such an approach is essential in efforts aimed at enhancing the

sustainable reconfiguration of university structures and functions whilst linking knowledge produced to diverse social economic and political facets of African societies in ways that promote and sustain competitiveness in a rapidly globalising world beset with technological advancements
