e-Learning Excellence Awards 2015: An Anthology of Case Histories Dan Remenyi, 2015-10-13 The call for case histories was announced in 2014 and 60 submissions were received describing on an outline basis what was achieved with these ap plications of e Learning There were 36 interesting examples described in these abstracts which were invited to forward a completed case history The panel of experts then chose 12 case history finalists who were invited to present their work at the 14th annual European Conference on e Learning at the University of Hertfordshire at Hatfield in the UK in October 2015 As can be seen from the Contents page the topics presented range widely as was expected when working with a subject like e Learning It may also be observed that the entrants come from many different parts of the world The competition requires the 3 best to be chosen and it is clear that the judges will have a challenging task to select the winners

*Developing Mathematical Literacy in the Context of the Fourth Industrial Revolution* Espinosa, Edgar Oliver Cardoso, 2021-03-12 In the context of the Fourth Industrial Revolution a world of continuous alterations is glimpsed where science and technology are at the base of economic competitiveness and where innovation plays a strategic role in global competition so that they are forced to cover a series of requirements to compete successfully in an increasingly globalized economy including high investments in both education and research Along these lines the formation of mathematical learning is important because it is oriented towards the development of a set of skills with the aim of resolving situations of daily and

professional lives It focuses on the acquisition of employing the different ways of representing information in the form of models constructions and graphs to determine the best decision making In this sense it includes the mastery of the handling of numbers measures and structures to carry out the interpretation of operations and representations of a quantitative nature on personal and professional situations For a society to favor innovation the use of mathematical information is an essential condition that allows the development of creativity and analysis of information Mathematics education plays a vital role in this development Developing Mathematical Literacy in the Context of the Fourth Industrial Revolution studies the formation of mathematical abilities in the context of the Fourth Industrial Revolution regarding its development of both teaching and learning strategies as well as the use of ICT and its use in the development of this discipline in students It is important that teachers of any educational level reorient their teaching strategies and their role as educators Therefore the chapters discuss up to date and relevant information on teaching and didactic tasks in the subject of mathematics This book highlights mathematical pedagogies ICT in mathematics learning teacher training and classroom strategies for mathematics It is intended for teachers pedagogical advisors business trainers higher education staff administrators teacher educators practitioners stakeholders researchers academicians and students interested in mathematical literacy in the fourth industrial revolution

**Development of executive function during childhood** Yusuke Moriguchi, Philip D Zelazo, Nicolas

Chevalier, 2016-04-01 Executive function refers to the goal oriented regulation of one's own thoughts actions and emotions Its importance is attested by its contribution to the development of other cognitive skills e.g. theory of mind social abilities e.g. peer interactions and academic achievement e.g. mathematics and by the consequences of deficits in executive function which are observed in wide range of developmental disorders such as attention deficit hyperactivity disorder and autism Over the last decade there have been growing interest in the development of executive function and an expanding body of research has shown that executive function develops rapidly during the preschool years with adult level performance being achieved during adolescence or later This recent work together with experimental research showing the effects of interventions targeting executive function has yielded important insights into the neurocognitive processes underlying executive function Given the complexity of the construct of executive function however and the multiplicity of underlying processes there are often inconsistencies in the way that executive function is defined and studied This inconsistency has hampered communication among researchers from various fields This Research Topic is intended to bridge this gap and provide an opportunity for researchers from different perspectives to discuss recent advances in understanding childhood executive function Researchers using various methods including behavioral experiments neuroimaging eye tracking computer simulation observational methods and questionnaires are encouraged to contribute original empirical research In addition to original empirical articles theoretical reviews and opinions perspective articles on promising future directions are welcome We hope that researchers from different areas such as developmental psychology educational psychology

experimental psychology neuropsychology neuroscience psychiatry computational science etc will be represented in the Research Topic **Empowering Novice Academics for Student Success** Dr Johann Hugo,2021-04-26 This book is essential for academics that enter the field of higher education and training as it focuses on preparing teachers and trainers to respond appropriately to student success challenges Student success is a burning issue both globally and locally While student achievement is determined by a combination of factors teachers and their teaching practices do matter Higher education teachers are expected to fulfil different roles at different times such as planning for curriculum implementation mentorship and coaching facilitating learning resource development and student assessment Against this background the primary purpose of Empowering novice academics for student success Wearing different hats is building the capacity of novice teachers and trainers to play an influential role in increasing student success throughput *Literacy as Numbers Teacher's Book* Mary Hamilton,Bryan Maddox,Camilla Addey,2015-03-05 A collaborative series with the University of Cambridge Faculty of Education highlighting leading edge research across Teacher Education International Education Reform and Language Education **Big Data** John Storm Pedersen,Adrian Wilkinson,2019 Promise Application and Pitfalls
