Payment protection insurance market investigation Great Britain: Competition Commission,2012-04-11 In this report the Competition Commission CC confirmed that it would introduce a remedies package based around a point of sale prohibition for all forms of payment protection insurance PPI with the exception of retail PPI after detailing how it will benefit customers The point of sale prohibition would stop the completion of sales of PPI during the sale of the associated credit product such as a personal loan It was one of a package of measures the CC planned to introduce following its investigation into PPI 2009 ISBN 9780117067363 which concluded that businesses that offer PPI alongside credit face little or no competition when selling PPI to their credit customers The report and in particular the proposed point of sale prohibition were the subject of a legal challenge to the Competition Appeal Tribunal CAT by Barclays supported by Lloyds Banking Group and Shop Direct Group Financial Services Ltd Whilst upholding the CC s conclusions as to the competition problems in this market the CAT ruled that it must in particular consider further the role and importance of a potential drawback to the prohibition namely that it might inconvenience customers Following the CAT s judgment the

CC carried out a detailed analysis of the likely effects of such a prohibition and concluded that the benefits of a package of remedies including the prohibition by introducing greater competition and choice and lower prices to the market would outweigh the disadvantages in particular the potential inconvenience to some customers **BNA's Banking Report** ,2005

Great Britain: Competition Commission,2006-04-21 In light of the concerns that have been raised about the lack of transparency of credit card charges in the UK particularly in relation to interest rates charged for store card credit this matter was referred by the Office of Fair Trading to the Competition Commission in March 2004 The Commission s inquiry focuses on two key aspects store card credit services to retailers and related insurance services and consumer credit through store cards and related insurance services These cards offer a method of payment and credit option which are retailer specific and are mostly operated by department stores and clothing retailers The investigation is based on data relating to the period from 1999 to 2003 supplemented by relevant information for 2004 and projections for 2005 and 2006 and focuses on the functioning of the market as a whole rather than on the conduct of individual companies Issues examined include relevant economic markets and the wider regulatory framework proposals to reform the legislation governing the credit market and statutory issues factors that prevent restrict or distort competition detrimental effects on customers and options for remedial action The report finds that the interest rates charged on store cards are too high generally annual percentage rates APRs of between 10 to 20 per cent above required levels resulting in an estimated cost for consumers of at least 55 million a year and possibly significantly more A number of remedies are identified that store card credit providers should make including warning cardholders on monthly statements that cheaper credit may be available elsewhere providing more

and clearer information on all monthly statements offering an option to pay by direct debit and offering payment protection insurance separately from other elements of store card insurance Assessing Data Security United States. Congress. House. Committee on Financial Services, 2005
