Reddy, Chien Ming Wang, Van Hai Luong, Anh Tuan Le, 2022-09-20 This book presents articles from the Second International Conference on Sustainable Civil Engineering and Architecture held on 30 October 2021 in Ho Chi Minh City Vietnam. The conference brings together international experts from both academia and industry to share their knowledge expertise to facilitate collaboration and improve cooperation in the field. The book highlights the latest advances in sustainable architecture and civil engineering covering topics such as offshore structures structural engineering construction materials and architecture.

Pushing Frontiers - Imaging For Photon Science Jiaguo Zhang, Iain Sedgwick, Cornelia B. Wunderer, 2024-12-24 Developments of cutting edge X ray imaging detectors are largely driven by experiments at the large photon science facilities i.e the synchrotron radiation sources and free electron lasers FELs which enable a wealth of investigations in physics material science biology chemistry environmental sciences and beyond. The next generation radiation sources namely diffraction limited storage rings DLSR and high repetition rate FELs operated in the continuous wave CW mode not only offer brilliant opportunities for research but also pose new challenges and requirements for the X ray detectors required to exploit them fully. Examples include the high count rate capability required at the DLSRs the ultra high continuous frame rate and data throughput at the FELs and a broad photon energy range from tens of eV to hundreds of keV spanned by the facilities. In order to meet the new requirements posed by the most advanced photon science facilities envisioned or already under development around the world today various novel photon detection and imaging concepts are being investigated and detector technologies are advancing fast. The goal of this research topic is to address the challenges and discuss the critical problems encountered in imaging systems for photon science including but not limited to sensing materials ASICs readout electronics detector systems and data reduction. Moreover it will encompass a discussion of the development strategies technological advances and recent achievements of each subject thereby facilitating the realization of complete concepts for novel imaging systems as well as further developments of individual detector technologies.
