Infrastructures for Peace in Sub-Saharan Africa Mediel Hove,Geoff Harris,2019-06-14 Cultures of violence are characteristic of many countries in sub Saharan Africa and attempts to move towards cultures of peace have often proved difficult and ineffectual And yet the wide variations in levels of violence within and between countries show that it is not inevitable rather it is the result of choices made at individual community and societal levels This book examines the potential of peace infrastructures as vehicles to strengthen and spread progress towards cultures of peace Peace infrastructures vary

hugely in sophistication and level The examples examined in this book range from tiny structures which help resolve conflicts between individuals and within community organisations peace committees which serve local communities peace education and peace club programmes in schools mediation mechanisms to prevent election violence and to ministries of peace to coordinate government and non government efforts in peacemaking and peacebuilding The overall finding is that the development of peace infrastructures at all levels has great potential to build cultures of peace 1 It is the only book available which documents the experience and potential of nonviolence in post independence sub Saharan Africa 2 It makes a persuasive case for the development of various peace infrastructures in order to make peace sustainable 3 It explains how strategic planning can be utilised both to bring about change and to institutionalise it **Journalism, Culture and Society**

Omega Douglas, Angela Phillips, 2022-11-30 Drawing upon a range of theoretical perspectives including cultural studies postcolonial theory critical race studies political economy and sociology *Journalism Culture and Society* examines journalism as a democratic necessity that often fails to live up to its promise This text takes a step back from prevailing idealistic approaches in which theory is often seen as a threat rather than a service to the better understanding of practice and mainstream journalism in western democracies is seen as unproblematic Instead using international examples the authors provide a critique for those who seek to improve journalistic practice whilst not losing sight of the profound practical dilemmas that journalists around the world experience in their working lives from the resources available to them to the institutions and political contexts in which they work Readers are encouraged to consider why journalists choose or are expected to choose particular subjects or tropes in their work and the implications of these choices *Journalism Culture and Society* is a valuable resource for students academics and practitioners in the areas of media journalism and communication
