Representations of Technology in Science Fiction for Young People Noga Applebaum,2009-09-10 In this new book Noga Applebaum surveys science fiction novels published for children and young adults from 1980 to the present exposing the anti technological bias existing within a genre often associated with the celebration of technology Applebaum argues that perceptions of technology as a corrupting force particularly in relation to its use by young people are a manifestation of the enduring allure of the myth of childhood innocence and result in young adult fiction that endorses a technophobic agenda This agenda is a form of resistance to the changing face of childhood and technology s contribution to this change Further Applebaum contends that technophobic literature disempowers its young readers by implying that the technologies of the future are inherently dangerous while it neglects to acknowledge children s complex yet pleasurable interactions with technology today The study looks at works by well known authors including M T Anderson Monica Hughes Lois Lowry Garth Nix and Philip Reeve and explores topics such as ecology cloning the impact of technology on narrative structure and the adult child hierarchy While focusing on the popular genre of science fiction as a useful case study Applebaum demonstrates that negative attitudes toward technology exist within children s literature in general making the book of considerable interest to scholars of both science fiction and children s literature

Christine H. Leland, Mitzi Lewison, Jerome C. Harste, 2017-11-03 Inviting multiple ways of critically engaging with literature, this text offers a fresh perspective on how to integrate children's literature into and across the curriculum in effective, purposeful ways. Structured around three mantras that build on each other: Enjoy, Dig deeply, Take action, the book is rich with real examples of teachers implementing critical pedagogy. The materials and practical strategies focus on issues that impact children's lives, building from students' personal experiences and cultural knowledge to using language to question the everyday world, analyze popular culture and media, understand how power relationships are socially constructed, and consider actions that can be taken to promote social justice. Written for teachers and teacher educators, each chapter opens with three elements that are closely linked: classroom vignettes showcasing the use of literature and inviting conversation, three key principles elaborating the main theme of the chapter and connecting theory with practice, and related research on the topics and their importance for curriculum. Other chapter features include key issues in implementation, suggestions for working with linguistically and culturally diverse students, alternative approaches to assessment, and suggestions for further reading. A companion website to enrich and extend the text includes an annotated bibliography of literature selections, suggested text

sets resources by chapter and ideas for professional development Changes in the Second Edition Voices from the Field vignettes include examples from inspiring educators who use trade books to promote critical thinking and diversity Updated chapters include information on new technology and electronic resources New references in the principles sections and new resources for further study New children s books added throughout the chapters as well as to the companion website
