*Advances in Human Factors and Ergonomics 2012- 14 Volume Set* Gavriel Salvendy, Waldemar Karwowski, 2012-08-06  
With contributions from an international group of authors with diverse backgrounds this set comprises all fourteen volumes of the proceedings of the 4th AHFE Conference 21-25 July 2012. The set presents the latest research on current issues in Human Factors and Ergonomics. It draws from an international panel that examines cross-cultural differences, design issues, usability, road and rail transportation, aviation, modeling and simulation, and healthcare. Advances in the Human Side of Service Engineering James C. Spohrer, Louis E. Freund, 2012-07-11. If there is any one element to the engineering of service systems that is unique, it is the extent to which the suitability of the system for human use, human service, and excellent human experience has been and must always be considered. An exploration of this emerging area of research and practice. Advances in the Human Side of Service Engineering Innovating in Practice Tiziana Russo-Spena, Cristina Mele, Maaria Nuutinen, 2016-11-13. The purpose of the book is to devise an alternative conceptual vocabulary for studying innovation by stressing the role of social, contextual, and cultural perspectives. This vocabulary is drawn on a service and on sociological perspectives on innovation based on the ontological assumption that innovation is a value co-creation matter and that it takes place in a reality that is multiple, constructed, and socially embedded. The aim is to tackle key issues such as social construction, service innovation, knowledge and learning processes, value co-creation, innovating, and innovation activities, networking, and collaborative innovation.
