

# Rewriting Rational Expressions: Mastery Test

## Question 3 of 5

**Instructions:** Type the correct answer in each box. Use numerals instead of words.

Multiply the expressions.

$$\frac{3x^2 + 3x - 21}{-3x^2 - 3x + 12} \cdot \frac{3x^2 + 7x + 10}{3x^2 + 7x + 10}$$

If  $a = 1$ , find the values of  $b$ ,  $c$ , and  $d$  that make the given expression equivalent to the expression below.

$$\frac{bx + b}{cx + d}$$

$b = 21$   $c = 20$  and  $d = 63$

The Classroom Arsenal Douglas D. Noble, 2017-09-29 A quarter of a century after its initial publication *The Classroom Arsenal* remains pivotal in understanding and challenging the relentless promotion of technology to reform education This seemingly benign education technology juggernaut carries forward the momentum of military agendas in man machine systems detailed in the book Promoters continue to flood schools with technology and its still unfulfilled promise of cutting edge personalized learning Meanwhile they continue as well their insatiable pursuit of federal funding educational legitimacy corporate profits and access to student subjects and their accumulated learning data for product development Less understood though is a companion enterprise there from the start to replace teaching and learning in traditional classrooms by efficient automated systems that manage and monitor human cognition and learning for high performance systems from weapons systems to high tech corporations As education is moved imperceptibly away from its traditional humanistic aims and from the classroom itself the goal of this human engineering project the depersonalized accumulation of cognitive components for a 21st century militarized economy best befits the book's original title *The Human Arsenal* This ongoing military corporate sponsored enterprise continues to impact education today largely unnoticed One example is the federally funded Advanced Distributed Learning Initiative ADL which has been a major force behind the implementation of electronic learning systems now used in all Defense Department and federal employee training With the Defense Advanced Research Project Agency ARPA ADL is developing structures to capture students soft skills and the Army Research Laboratory is developing intelligent tutoring systems to enable instructional management of affect engagement and grit perseverance ADL through the Department of Defense has developed Experience API a learning technology that can monitor all student online and offline interactions and archive these in data lockers or learning record stores ADL has already impacted thousands of school districts through nonprofits such as IMS Global and Future Ready Schools part of an industry massively subsidized by high tech corporations and valued at 255 billion annually A 90 million Advanced Research Projects Agency for Education ARPA ED modeled after the military's ARPA has been proposed to fund dramatic breakthroughs in learning and teaching These include digital tutors as effective as personal tutors and with the Navy's Full Spectrum Learning project data collection tools for personalized education modeled after corporate data analysis that identifies consumer patterns and preferences ADL is just one example of how the military corporate ed tech enterprise is changing public education by hollowing it out into something that can be digitized data driven automated and monitored Its promoters envision education as children interacting with online learning systems where based on past performance algorithms will serve up what each student needs to know next Through this digital curriculum students create virtual

educational identities at very young ages and learning devices are watching students as much as students are watching them. Such is the education landscape presaged by *The Classroom Arsenal* a quarter century ago whose origins and trajectories need to be deeply understood now more than ever.

**Knowledge and Truth in Plato** Catherine Rowett, 2018-04-19 Several myths about Plato's work are decisively challenged by Catherine Rowett: the idea that Plato agreed with Socrates about the need for a definition of what we know; the idea that he set out to define justice in the *Republic*; the idea that knowledge is a kind of true belief; or that Plato ever thought that it might be something like that. The idea that knowledge proper is propositional and that the *Theaetetus* was Plato's best attempt to define knowledge as a species of belief and that it only failed due to his incompetence. Instead, Rowett argues that Plato was replacing the failed methods of Socrates including his attempt to find a definition or single common factor and that he replaced those methods with methods derived from geometry including methods that involve inference from shadows to their originals, a method which Rowett calls the iconic method. As a result, we should see that Plato is presenting the knowledge that is acquired as non-propositional and pictorial in nature and that it is to be identified not with knowledge of facts nor of objects but of types qua types, types that stand to the tokens that are used in our enquiry as original to shadow. The book includes detailed studies of the *Meno*, *Republic* and *Theaetetus* and argues that the insights that Plato brings about the nature of conceptual knowledge, its importance in underpinning all other activities and about the notion of truth as it applies to conceptual competence are significant and should be taken seriously as a corrective to areas in which current analytic philosophy has lost its way.

**Phenomenological Interpretations of Ancient Philosophy** Kristian Larsen, Pål Rykkja Gilbert, 2021-05-03. Ancient philosophy has from the outset inspired phenomenological philosophers in a special way. *Phenomenological Interpretations of Ancient Philosophy* offers fresh perspectives on the manner in which ancient Greek thought has influenced phenomenology and traces the history of this reception. Unlike various

related treatments the present volume offers a broad account of this topic that includes chapters on Edmund Husserl Martin Heidegger Hans Georg Gadamer Jacob Klein Hannah Arendt Eugen Fink Jan Patočka Emmanuel Levinas and Jacques Derrida This collection of essays edited by Kristian Larsen and Pål Rykkja Gilbert is addressed to students of ancient philosophy and the phenomenological tradition as well as to readers who have a general interest in the fascinating yet complex connection between ancient Greek thought and phenomenological philosophy Contributions by Jussi Backman Pål Rykkja Gilbert Burt Hopkins Filip Karfík Alexander Kozin Kristian Larsen Arnaud Mac Claudio Majolino Hans Ruin Thomas Schwarz Wentzer Vigdis Songe Møller Tanja Staehler Morten S. **The Freedom of Peaceful Action** Stuart K. Hayashi, 2014-04-23 The Freedom of Peaceful Action is the first installment of the trilogy The Nature of Liberty which makes an ethical philosophic case for individual liberty and the free market against calls for greater government regulation and control The trilogy makes a purely secular and nonreligious ethical case for the individual's rights to life liberty private property and the pursuit of happiness as championed by the U.S. Founding Fathers Inspired by such philosophic defenders of free enterprise as John Locke Herbert Spencer and Ayn Rand The Nature of Liberty shows that such individual rights are not imaginary or simply assertions but are institutions of great practical value making prosperity and happiness possible to the degree that society recognizes them The trilogy demonstrates the beneficence of the individual rights approach by citing important findings in the emerging science of evolutionary psychology Although the conclusions of evolutionary psychology have been long considered to be at odds with the philosophies of individual liberty and free markets The Nature of Liberty presents a reconciliation that reveals their ultimate compatibility as various important findings of evolutionary psychology being logically applied confirm much of what philosophic defenders of liberty have been saying for centuries Moreover proceeding from the viewpoint of Rand this work argues that the structure of society most conducive to practical human well-being is commensurately the most moral and humane approach as well The trilogy's first installment The Freedom of Peaceful Action focuses on the secular philosophic foundation for a society based on individual rights Starting from a defense of the efficacy of observational reason against criticisms from Immanuel Kant and Karl Popper it demonstrates how a philosophic position of individual liberty and free markets is the logical result of the consistent application of human reason to observing human nature This installment demonstrates that any political system that wishes for its citizens to thrive must take human nature into account and that an accounting of human nature reveals that a system of maximum liberty and property protection is the one most conducive to peace and human well-being

**Enchantment C.** Stephen Jaeger, 2012-03-19 What is the force in art C. Stephen Jaeger asks that can enter our consciousness inspire admiration or imitation and carry a reader or viewer from the world as it is to a world more sublime We have long recognized the power of individuals to lead or enchant by the force of personal charisma and indeed in his award-winning *Envy of Angels* Jaeger himself brilliantly parsed the ability of charismatic teachers to shape the world of medieval learning In *Enchantment*

he turns his attention to a sweeping and multifaceted exploration of the charisma not of individuals but of art For Jaeger the charisma of the visual arts literature and film functions by creating an exalted semblance of life a realm of beauty sublime emotions heroic motives and deeds godlike bodies and actions and superhuman abilities so as to dazzle the humbled spectator and lift him or her up into the place so represented Charismatic art makes us want to live in the higher world that it depicts to behave like its heroes and heroines and to think and act according to their values It temporarily weakens individual will and rational critical thought It brings us into a state of enchantment Ranging widely across periods and genres Enchantment investigates the charismatic effect of an ancient statue of Apollo on the poet Rilke of the painter Durer's self portrayal as a figure of Christ like magnificence of a numinous Odysseus washed ashore on Phaeacia and of the black and white projection of Fred Astaire dancing across the Depression era movie screen From the tattoos on the face of a Maori tribesman to the haunting visage of Charlotte Rampling in a film by Woody Allen Jaeger's extraordinary book explores the dichotomies of reality and illusion life and art that are fundamental to both cultic and aesthetic experience *The New Yearbook for Phenomenology and Phenomenological Philosophy* Daniele De Santis, Emiliano Trizio, 2017-10-12 Edmund Husserl between Platonism and Aristotelianism Aim and Scope The New Yearbook for Phenomenology and Phenomenological Philosophy provides an annual international forum for phenomenological research in the spirit of Husserl's groundbreaking work and the extension of this work by such figures as Scheler Heidegger Sartre Levinas Merleau Ponty and Gadamer Contributors Thomas Arnold Kimberly Baltzer Jaray Michael Barber Irene Breuer Steven G Crowell John Drummond Clevis Headley George Heffernan Burt Hopkins Arun Iyer Adam Konopka Carlos Lobo Claudio Majolino Danilo Manca Emanuele Mariani Ignacio Quepons Daniele De Santis Biagio G Tassone Emiliano Trizio William Tullius Marta Ubiali and Fotini Vassiliou Submissions Manuscripts prepared for blind review should be submitted to the Editors bhopkins seattleu edu and drummond fordham edu electronically via e mail attachments **Masters of Mathematics** Robert A. Nowlan, 2017-05-13 The original title for this work was Mathematical Literacy What Is It and Why You Need it The current title reflects that there can be no real learning in any subject unless questions of who what when where why and how are raised in the minds of the learners The book is not a mathematical text and there are no assigned exercises or exams It is written for reasonably intelligent and curious individuals both those who value mathematics aware of its many important applications and others who have been inappropriately exposed to mathematics leading to indifference to the subject fear and even loathing These feelings are all consequences of meaningless presentations drill rote learning and being lost as the purpose of what is being studied Mathematics education needs a radical reform There is more than one way to accomplish this Here the author presents his approach of wrapping mathematical ideas in a story To learn one first must develop an interest in a problem and the curiosity to find how masters of mathematics have solved them What is necessary to be mathematically literate It's not about solving algebraic equations or even making a geometric proof These are valuable skills but not evidence of literacy We

often seek answers but learning to ask pertinent questions is the road to mathematical literacy Here is the good news new mathematical ideas have a way of finding applications This is known as the unreasonable effectiveness of mathematics
