Self-Cultivation in Chinese and Greco-Roman Philosophy David Machek,2025-05-15 In early China and ancient Greece self cultivation was considered crucial for leading a flourishing fulfilled life In this cross cultural study David Machek presents and interprets six influential Greek and Chinese self cultivation theories advocated by Mengzi Zhuangzi and Xunzi as well as Plato Aristotle and the Stoics in order to put forward the overarching narrative that self cultivation amounts to strengthening the best part of the human self the heart in the Chinese context and the mind in the Greek context Advancing new readings of classic texts Machek shows that Greek approaches to self cultivation privilege intellectual pursuits while Chinese approaches give more weight to non intellectual activities such as learning manual crafts and performing rituals He also demonstrates how both ancient traditions understand the self as a heterogeneous community of organic entities each needing different provisions to flourish which aligns the ancient Greek view closer to the early Chinese view As such this book reinforces the underlying structural and conceptual similarities between the two traditions and makes an important contribution to diversifying philosophical conversations

John Holt Roland Meighan,2014-10-23 John Holt the American educator was passionate about the need for alternatives to traditional institutional schooling seeing schools as often hindering children from learning rather than helping them he became an important proponent of homeschooling or unschooling was a pioneer in youth rights theory and had a profound influence on school reform in particular and educational philosophy in general Here Roland Meighan challenges the often held notion that

Combining historical analysis and contemporary ethical theory, this text serves as both an introduction to Rousseau's theories of education and a critique of his views and shows how Rousseau was a pioneer in exploring educational issues within the context of his own philosophical problems in order to present innovative solutions. **R. S. Peters** Stefaan E. Cuypers, Christopher Martin, 2014-10-23 What does it mean to say that someone is an educated person? How do we know what's worth including in a school curriculum? Is a good moral education about developing good habits or critical thinking? What role does the development of knowledge and understanding play in living a good life? These are all questions that were robustly taken up by the philosopher of education R. S. Peters. In an era of immense reform and confusion about the values, aims and purposes of education, Peters developed a clear and nuanced account of what education is really about and how educational policy and practice can make good on its promise. This text undertakes a careful and accessible reconstruction of the major themes of Peters' thought in order to demonstrate the continuing relevance of his project both for educational researchers and teachers and student teachers seeking to better understand the nature and scope of their work and study. **John Dewey** Richard Pring, 2014-10-23 Bertrand Russell's *History of Philosophy* refers to Dewey as generally admitted to be the leading living philosopher of America. This honourable mention lay partly in his pragmatic theory of meaning through which so many baffling philosophical problems were claimed to have been solved as well as educational ones. It is in connection with his educational ideas, however, that Dewey became either famous or infamous. In the United States he had been seen both as saviour of American education by those who welcomed a more child-centred curriculum and yet as worse than Hitler by those who saw his ideas as undermining traditional education, an accusation shared by his detractors in Britain. This account seeks to bring together Dewey's educational thinking and its frequently forgotten foundations in a pragmatic theory of meaning. In so doing, the book seeks to show that John Dewey is a philosopher of education for our time. **Rudolf Steiner** Heiner Ullrich, 2014-10-23 Rudolf Steiner is one of the most controversially judged educational reformers of the twentieth century. Although he received little recognition within his field, his educational thought has had a sustained and profound influence not only in the development of the Waldorf Schools but also in healing, socially therapeutic work, psychosomatic medicine, biological dynamics, agriculture, corporate organisation, fine arts and architecture. Heiner Ullrich paints a concise and well-grounded portrait of the creator of the anthroposophic doctrine and

Waldorf pedagogy The text describes a wide arc from the intellectual biography of Rudolf Steiner across his basic ideas on human development and education to include discussion of the organisation curriculum methods and success of the Waldorf Schools
