Workshops Michael Alexander, Pasqua D'Ambra, Adam Belloum, George Bosilca, Mario Cannataro, Marco Danelutto, Beniamino Di Martino, Michael Gerndt, Emmanuel Jeannot, Raymond Namyst, Jean Roman, Stephen L. Scott, Jesper Larsson Traff, Geoffroy Vallee, Josef Weidendorfer, 2012-04-14 This book constitutes thoroughly refereed post-conference proceedings of the workshops of the 17th International Conference on Parallel Computing Euro-Par 2011 held in Bordeaux, France, in August 2011. The papers of these 12 workshops: CCPI, CGWS, HeteroPar, HiBB, HPCVirt, HPPC, HPSS, HPCF, PROPER, CCPI and VHPC focus on promotion and advancement of all aspects of parallel and distributed computing. *Euro-Par 2007 Workshops:*

Parallel Processing Luc Bougé, Martti Forsell, Jesper Larsson Träff, Achim Streit, Wolfgang Ziegler, Michael Alexander, Stephen Childs, 2008-03-08 Parallel and distributed processing, although within the focus of computer science research for a long time, is gaining more and more importance in a wide spectrum of applications. These proceedings aim to demonstrate the use of parallel and distributed processing concepts in different application fields and attempt to spark interest in novel research directions to advance the embracing model of high performance computing research in general. The objective of these workshops is to specifically address researchers coming from university, industry and governmental research organizations and application-oriented companies in order to close the gap between purely scientific research and the applicability of the research ideas to real-life problems. Euro-Par is an annual series of international conferences dedicated to the

promotion and advancement of all aspects of parallel and distributed computing. The 2007 event was the 13th issue of the conference. Euro-Par has for a long time been eager to attract colocated events sharing the same goal of promoting the development of parallel and distributed computing both as an industrial technique and an academic discipline, extending the frontier of both the state of the art and the state of the practice. Since 2006, Euro-Par offers researchers the chance to colocate advanced technical workshops back-to-back with the main conference. This is for a mutual benefit: the workshops can take advantage of all technical and social facilities which are set up for the conference so that the organizational tasks are kept to a minimal level; the conference can rely on workshops to experiment with specific areas of research which are not yet mature enough or too specific to lead to an official full-edged topic at the conference. **Parallel and Distributed Processing and**
