

3. Marking points

3.1 Marking of lists

This applies to questions requiring a set number of responses, but for which students have provided extra responses. The general principle to be followed in such a situation is that 'right + wrong = wrong'.

Each error / contradiction negates each correct response. So, if the number of errors / contradictions equals or exceeds the number of marks available for the question, no marks can be awarded.

However, responses considered to be neutral (indicated as * in example 1) are not penalised.

Example 1: What is the pH of an acidic solution?

[1 mark]

Student	Response	Marks awarded
1	green, 5	0
2	red*, 5	1
3	red*, 8	0

Example 2: Name two magnetic materials.

[2 marks]

Student	Response	Marks awarded
1	iron, steel, copper, aluminium	0

3.2 Marking of questions requiring a list

For questions requiring a specified number of responses (maximum of 10 responses) awarded marks are given according to the number of correct responses given. For example, for a question requiring 2 correct answers, a list of 3 correct answers will result in 2 marks being awarded.

3.3 Marking questions requiring calculation

When a question requires a calculation, marks are given for the calculation completed correctly. An incorrect calculation will result in 0 marks being awarded. An incorrect calculation will result in 0 marks being awarded. If a calculation is correct, but the answer is incorrect, the correct answer may be awarded.

Full marks are only awarded for a correct final answer from a correct working.

3.4 Interpretation of 'or'

When a question requires a list of responses, 'or' should be given credit only if it is clear that the list is different to the correct answer.
