SEC Docket United States. Securities and Exchange Commission,2009 **Suicide Among the Armed Forces** Antoon Leenaars,2016-12-05 Not since the great military suicide epidemic of the American Civil War have we seen so many of our heroes our soldiers and veterans die by suicide Why War is violence There is intent to cause death or serious injury or threat to the physical and psychological integrity of others War stress is unforgiving Suicide is an all too frequent response Today one member of the military dies by suicide every day This is a new epidemic This book addresses some tough questions What do we know about suicides in the military Are rates high Or low Is military suicide the same or different in the United States and Canada Is military culture relevant Do we know the causes patterns and associations Is suicide among the armed forces similar to or different from suicide among civilians Can it be altruistic Through individual case studies and general population approaches we attempt to understand the cost of military service It is especially through the personal stories of the great Civil War hero General Emory Upton Admiral of the Navy Mike Boorda and Hospital Corpsman Chris Purcell that we find answers We learn there is a relative lack of understanding about military suicides mainly due to the very complexity of suicide The nature of suicide is not monolithic it is multi determined Military service we find is a risk factor for suicide and suicidal behavior Military veterans are twice as likely as civilians to die by suicide Posttraumatic stress disorder PTSD and traumatic brain Injury TBI are especially noted to be huge risk factors but so are other physical and psychological injuries Sadly the aftershocks of war include not only suicides but also incarceration motor vehicle accidents homicides homicide s suicides and many more faces of violence And there are many more uncounted wounded and dead The families of traumatized soldiers and veterans too are indirect victims of their traumatic experience and for some their suicides there is secondary traumatization Yet as this book shows we must not forget that despite the unbearable pain of war soldiers veterans and their military families including children are typically resilient They can survive Without question our vulnerable heroes and veterans are at risk for suicide But there is secrecy surrounding this which may well be the biggest barrier The government the Department of Defense the military veterans groups survivors health providers and other stakeholders need to develop and support more research more programs and more care for suicidal and disabled armed

services personnel veterans and survivors This war stress needs to stop      *Congressional Record* United States.
