Sergey V. Krivovichev,2019-04-23 The Arctic zone of the Earth is a major source of mineral and other natural resources for the future development of science and technology It contains a large supply of strategic mineral deposits including rare earths copper phosphorus niobium platinum group elements and other critical metals The continued melting of the sea ice due to climate change makes these resources more accessible than ever before However the mineral exploration in the Arctic has always been a challenge due to the climatic restrictions remote location and vulnerability of Arctic ecosystems This book covers a broad range of topics related to the problem of Arctic mineral resources including geological geochemical and mineralogical aspects of their occurrence and formation chemical technologies and environmental and economic problems related to mineral exploration The contributions can be tentatively classified into four major types geodynamics and metallogeny mineralogy and petrology mineralogy and crystallography and mining and chemical technologies associated with the exploration of mineral deposits and the use of raw materials for manufacturing new products The book can be of interest for all those interested in Arctic issues and especially in Arctic mineral resources and associated problems of mineralogy geology geochemistry and technology **Recarbonizing global soils - A technical manual of recommended**

management practices Food and Agriculture Organization of the United Nations,Intergovernmental Technical Panel on Soils,2021-09-07 During the last decades soil organic carbon SOC attracted the attention of a much wider array of specialists

beyond agriculture and soil science as it was proven to be one of the most crucial components of the earth's climate system which has a great potential to be managed by humans. Soils as a carbon pool are one of the key factors in several Sustainable Development Goals in particular Goal 15. Protect, restore and promote sustainable use of terrestrial ecosystems sustainably manage forests, combat desertification and halt and reverse land degradation and halt biodiversity loss with the SOC stock being explicitly cited in Indicator 15.3.1. This technical manual is the first attempt to gather in a standardized format the existing data on the impacts of the main soil management practices on SOC content in a wide array of environments including the advantages, drawbacks and constraints. This manual presents different sustainable soil management (SSM) practices at different scales and in different contexts supported by case studies that have been shown with quantitative data to have a positive effect on SOC stocks and successful experiences of SOC sequestration in practical field applications. Volume 2 includes a description of hot spots of SOC stocks. This manual defines hot spots of SOC as areas that represent a proportionally little of the global land surface but on which SOC storage is highly effective, bright spots as large land areas with low SOC stocks per km² that represent a potential for further carbon sequestration.

Cleaner Treatment Technologies and Productions in The Energy Industry, 2nd edition Jiang Bian, Xuwen Cao, Chuang Wen, Lin Teng, Zheng Li, 2023-04-29

s the rapid development of the world's economy brought serious environmental problems the economy must accelerate industrial structure adjustment and development mode transformation to achieve sustainable development. A cleaner production mode based on cleaner technology is a crucial way to solve the conflict between economic growth and environmental protection effectively. In essence, cleaner production is a kind of production mode in which the environmental strategy of overall prevention is adopted for the production process to reduce or eliminate their possible harm to human beings and the environment while fully meeting human needs and maximizing social and economic benefits. Fossil energy and renewable energy have promoted the development of many emerging industries such as the automobile industry, aerospace technology, modern production and processing and modern transportation industry and preventing waste production while increasing efficiencies in the uses of energy is a crucial issue. Specific measures include Using clean energy and raw materials Adopting advanced technology and equipment Comprehensive utilization Reducing pollution from the source Improving utilization efficiency Reducing or avoiding the generation and emission of pollutants in the process of production. This Research Topic aims to report the most important and latest technological advances in cleaner treatment technologies of fossil energy such as oil and natural gas and renewable energy such as hydrogen energy and geothermal energy and serves as a platform for addressing and discussing theoretical and practical cleaner production.

Causal Inference in Econometrics Van-Nam Huynh,Vladik Kreinovich,Songsak Sriboonchitta,2015-12-28 This book is devoted to the analysis of causal inference which is one of the most difficult tasks in data analysis when two phenomena are observed to be related it is often difficult to decide whether one of them causally influences the other one or whether these two phenomena have a common cause This analysis is the main focus of this volume To get a good understanding of the causal inference it is important to have models of economic phenomena which are as accurate as possible Because of this need this volume also contains papers that use non traditional economic models such as fuzzy models and models obtained by using neural networks and data mining techniques It also contains papers that apply different econometric models to analyze real life economic dependencies

Remotely Sensed Albedo Jean-Louis Roujean,Shunlin Liang,Tao He,2021-02-24 Albedo is a known and documented phenomenon defined as the reflectivity of a surface i e the ratio of reflected light energy to incident light energy It is a dimensionless quantity used in particular in agro forestry urban environment cryosphere and geology It is an Essential Climate Variable ECV deemed extremely meaningful to compute the earth heat balance The albedo of natural surfaces varies largely especially in the visible with the lowest values found for water bodies and dense vegetation canopies and the highest values for desert and snow It also changes with the angular distribution and spectral composition of the incident radiation and with the surface moisture Satellite observations allow consistent measuring of the surface albedo at continental scale over a short period of time Long term series of surface albedo are good indicators of climate change especially over glaciers and polar caps On the other hand the albedo of bare soil provides a good diagnostic of their degradation The reliability of satellite albedo is verified against ground based radiometers and UAV which also serves to calibrate the instruments embarked on space borne observing systems and check the quality of the atmospheric correction

Texas Parks & Wildlife ,2015-07 **Manual of Forensic Taphonomy** James T. Pokines,Ericka N. L'Abbe,Steven A. Symes,2021-12-30 The main goals in any forensic skeletal analysis are to answer who is the person represented individualization how that person died trauma pathology and when that person died the postmortem interval or PMI The analyses necessary to generate the biological profile include the determination of human nonhuman or nonosseous origin the minimum number of individuals represented age at death sex stature ancestry perimortem trauma antemortem trauma osseous pathology odontology and taphonomic effects the postmortem modifications to a set of remains The Manual of Forensic Taphonomy Second Edition covers the fundamental principles of these postmortem changes encountered during case analysis Taphonomic processes can be highly destructive and subtract information from bones regarding their utility in determining other aspects of the biological profile but they also can add information regarding the entire postmortem history of the remains and the relative timing of those effects The taphonomic analyses outlined provide guidance on how to separate

natural agencies from human caused trauma These analyses are also performed in conjunction with the field processing of recovery scenes and the interpretation of the site formation and their postdepositional history The individual chapters categorize these alterations to skeletal remains illustrate and explain their significance and demonstrate differential diagnosis among them Such observations may then be combined into higher order patterns to aid forensic investigators in determining what happened to those remains in the interval from death to analysis including the environment s in which the remains were deposited including buried terrestrial surface marine freshwater or cultural contexts Features Provides nearly 300 full color illustrations of both common and rare taphonomic effects to bones derived from actual forensic cases Presents new research including experimentation on recovery rates during surface search timing of marine alterations trophy skulls taphonomic laboratory and field methods laws regarding the relative timing of taphonomic effects reptile taphonomy human decomposition and microscopic alterations by invertebrates to bones Explains and illustrates common taphonomic effects and clarifies standard terminology for uniformity and usage within in the field While the book is primarily focused upon large vertebrate and specifically human skeletal remains it effectively synthesizes data from human ethological geological paleontological paleoanthropological archaeological artifactual and zooarchaeological studies Since these taphonomic processes affect other vertebrates in similar manners The Manual of Forensic Taphonomy Second Edition will be invaluable to a broad set of forensic and investigative disciplines
