

Functions: Give One, Get One

Write each statement, choose the function(s) that best describes it, and explain your function.

Write or draw:

- Question 1:** Write a function that represents the graph of the parabola above.
- Answer 1:** The function is $y = -x^2 + 4x$.
- Question 2:** Write a function that represents the graph of the piecewise linear function above.
- Answer 2:** The function is $y = 2x$ for $0 \leq x \leq 2$, $y = -x + 4$ for $2 < x \leq 4$, $y = 2$ for $4 < x \leq 6$, $y = -x + 8$ for $6 < x \leq 8$, and $y = x - 4$ for $8 < x \leq 10$.

Write or draw:

- 1. The graph of the function $y = x^2 - 4x$ is shown below.
- 2. The graph of the function $y = x^2 - 4x$ is shown below.

Write or draw:

- 1. The graph of the function $y = x^2 - 4x$ is shown below.
- 2. The graph of the function $y = x^2 - 4x$ is shown below.

Workshop Precalculus Nancy Baxter-Hastings, 2002-02-22 The Workshop Precalculus text is part of the successful Workshop Mathematics Project based at Dickinson College Pennsylvania It combines interactive teaching and collaborative learning such that students become active participants in the learning process In this new text this proven pedagogy is used to cover topics in precalculus linear and quadratic functions and trig functions for example

Teaching and Learning High School Mathematics Charlene E. Beckmann, Denisse R. Thompson, Rheta N. Rubenstein, 2009-11-02 Too many high school students faced with mathematics in courses at the level of algebra and beyond find themselves struggling with abstract concepts and unwilling to pursue further study of mathematics When students curtail their course taking in mathematics they may be impacting their college and career options Thus high school mathematics teachers have the responsibility to help students recognize the value and importance of mathematics while also designing instruction that makes mathematics accessible to all students Ball and Bass 2000 as well as other mathematics educators have recognized that mathematics teachers not only need to know mathematics content and mathematics pedagogy i e teaching strategies but they also need to know how these ideas are integrated This mathematical knowledge for teaching is the knowledge that teachers of mathematics need and it differs from the knowledge that research or applied mathematicians must know This text is designed to provide teachers with insights into this mathematical knowledge for teaching Teaching and Learning High School Mathematics is likely different from many other texts that you have used It integrates both content and pedagogy to help you develop and build your own understanding of teaching The text is designed to help you develop deep conceptual understanding of fundamental mathematics Ma 1999 so that you are able to approach mathematics from multiple perspectives with many tools Such flexibility in teaching is essential if teachers are to help all students become mathematically proficient Throughout this book you are encouraged to work in cooperative teams This strategy is designed to help you develop a mathematics learning community and build a professional network that will be a valuable resource during your professional career Hopefully you will experience the benefits of engaging in rich mathematical discussions with peers and consider how to encourage such learning environments in your own classrooms Lesson planning is another element pervasive throughout this text To help teachers plan for effective student centered lessons the Question Response Support QRS Guide is introduced in Lesson 1.1 and used throughout the remainder of the lessons The QRS Guide is a tool on which teachers may record tasks or questions Q for students expected and observed student responses R and teacher support S in the form of additional just enough questions to support students in their progress on the task In each unit teachers expand their repertoire of teaching and learning elements and strategies and incorporate these elements as they plan additional lesson segments In Unit 4 lesson planning is formally introduced as teachers put together elements from previous units into complete cohesive lesson plans

Eureka Math Algebra II Study Guide Great Minds, 2016-06-29 The team of teachers

and mathematicians who created Eureka Math believe that it's not enough for students to know the process for solving a problem; they need to know why that process works. That's why students who learn math with Eureka can solve real-world problems even those they have never encountered before. The Study Guides are a companion to the Eureka Math program, whether you use it online or in print. The guides collect the key components of the curriculum for each grade in a single volume. They also unpack the standards in detail so that anyone, even non-Eureka users, can benefit. The guides are particularly helpful for teachers or trainers seeking to undertake or lead a meaningful study of the grade-level content in a way that highlights the coherence between modules and topics. We're here to make sure you succeed with an ever-growing library of resources. Take advantage of the full set of Study Guides available for each grade PK-12 or materials at eureka-math.org such as free implementation and pacing guides, material lists, parent resources, and more.

The American Mathematical Monthly, 1975. Includes articles as well as notes and other features about mathematics and the profession.

Eureka Math Pre-K Study Guide Great Minds, 2016-08-02. Eureka Math is a comprehensive content-rich PreK-12 curriculum that follows the focus and coherence of the Common Core State Standards in Mathematics (CCSSM) and carefully sequences the mathematical progressions into expertly crafted instructional modules. The companion Study Guides to Eureka Math gather the key components of the curriculum for each grade into a single location, unpacking the standards in detail so that both users and non-users of Eureka Math can benefit equally from the content presented. Each of the Eureka Math Curriculum Study Guides includes narratives that provide educators with an overview of what students should be learning throughout the year, information on alignment to the instructional shifts and the standards design of curricular components, approaches to differentiated instruction, and descriptions of mathematical models. The Study Guides can serve as either a self-study professional development resource or as the basis for a deep group study of the standards for a particular grade. For teachers who are new to the classroom or the standards, the Study Guides introduce them not only to Eureka Math but also to the content of the grade level in a way they will find manageable and useful. Teachers familiar with the Eureka Math curriculum will also find this resource valuable as it allows for a meaningful study of the grade-level content in a way that highlights the coherence between modules and topics. The Study Guides allow teachers to obtain a firm grasp on what it is that students should master during the year. The Eureka Math Curriculum Study Guide Grade PK provides an overview of all of the Pre-Kindergarten modules including Counting to 5, Shapes, Counting to 10, Comparison of Length, Weight, Capacity, and Numbers to 5, and Addition and Subtraction Stories and Counting to 20.

Home Learning Year by Year Rebecca Rupp, 2009-02-04. Finally, homeschoolers have a comprehensive guide to designing a homeschool curriculum from one of the country's foremost homeschooling experts. Rebecca Rupp presents a structured plan to ensure that your children will learn what they need to know when they need to know it, from preschool through high school. Based on the traditional pre-K through 12th-grade structure, Home Learning Year by Year features the integral subjects to be covered within each grade.

Standards for knowledge that should be acquired by your child at each level Recommended books to use as texts for every subject Guidelines for the importance of each topic which knowledge is essential and which is best for more expansive study based on your child's personal interests Suggestions for how to sensitively approach less academic subjects such as sex education and physical fitness
