Berger,Andreas Kuckertz,2016-02-25 This volume discusses the challenge of dealing with complexity in entrepreneurship innovation and technology research Businesses as well as entire economies are increasingly being confronted by widespread complex systems Fields such as entrepreneurship and innovation cannot ignore this reality especially with their inherent links to diverse research fields and interdisciplinary methods However most methods that allow more detailed analyses of complex problems are either neglected in mainstream research or are at best still emerging Against this backdrop this book provides a forum for the discussion of emergent and neglected methods in the context of complexity in entrepreneurship innovation and technology research and also acts as an inspiration for academics across related disciplines to engage more in complexity research *The Publishers Weekly* ,1895 **American Book Publishing Record Cumulative, 1950-1977** R.R. Intimesofdecliningeconomicgrowth companieshavetocontroltheircostsmore than ever to saveresources needed in the future Regardless of the economic size of the company the processes of production and logistics play a decisive role in stabilizing procedures and avoiding waste Both are important cost drivers in manufacturing companies and therefore they o er large potential savings Pervasive networking in the last years has contributed to a hitherto unknown transparency of global markets This harmonization opened up new possibilities of entering foreign markets for procurement and sales to the companies The emerging global procurement strategy was understood as a chance to rethink the relocation of existing production facilities to profit from existing differences in price and performance as a resource saving factor Many companies

tended towards a reduction of their vertical integration by outsourcing sections of their value chain These contracted services of production result in higher transport volumes increased complexity of supply processes and new requirements on logistic networks This trend of outsourcing has not stopped but is slowing down noticeably Additionally there is an increasing proportion of companies restoring business units that were outsourced before Reasons for turning back decisions are often to be found in missed goals It is not unusual that important cost factors were disregarded in the original basis of decision making In the meantime many companies have realized that it is easier to achieve stability of processes and therewith a control of costs by increasing their own contribution to production Especially in times of under utilized capacities like in the current crisis insourcing can be a strategic option

Thermoradiotherapy and Thermochemotherapy M. Heinrich Seegenschmiedt, Peter Fessenden, Clare C. Vernon, 2012-12-06 Hyperthermia has been found to be of great benefit in combination with radiation therapy or chemotherapy in the management of patients with difficult and complicated tumor problems It has been demonstrated to increase the efficacy of ionising radiation when used locally but also has been of help in combination with systemic chemotherapy where hyperthermia is carried out to the total body Problems remain with regard to maximizing the effects of hyperthermia as influenced by blood flow heat loss etc The present volume defines the current knowledge relative to hyperthermia with radiation therapy and or chemotherapy giving a comprehensive overview of its use in cancer management Philadelphia Hamburg June 1995 L W BRADY H P HEILMANN Preface In an attempt to overcome tumor resistance hypoxia or unfavorable tumor conditions oncological research has come to focus on gene therapy immunotherapy new cytotoxic agents and increasingly sophisticated radiotherapy Radiation research has been directed towards heavy particle therapy and modification of the radiation response by either protecting or sensitizing agents Improved dose localization using rotational or conformal strategies has also been implemented Recently changes in radiation fractionation schedules have shown promise of better results Hyperthermia in cancer therapy can be viewed similarly as another means to increase the sensitivity of tumors to radio and chemotherapy
