The Pursuit of Excellence Through Education Michel Ferrari, 2001-12 Although specific definitions may change over time few goals are considered more important to education than the pursuit of academic excellence There are many different viewpoints on this issue today among educational psychologists and other social scientists One particularly glaring fault line in the debate divides those who emphasize developing individual learning and those who focus on promoting cultural and institutional reform These two perspectives are rarely addressed in a single volume In this book well known theorists and researchers present a range of perspectives on how to promote excellence in education This allows those who stress transformation of educational practice and those who emphasize individual abilities to speak to each and invites readers to jointly consider the arguments for both positions or for some synthesis of the two The point is to consider how these two divergent viewpoints can be reconciled or simply coordinated in an effort to benefit both students and society at large The main thesis is that excellence can be fostered without sacrificing equity both of which are fundamental tenets of a democratic education The issues addressed in this book have implications and relevance for school reform efforts and across the fields of educational psychology curriculum and instruction philosophy of education and

educational leadership The volume provides a unique source for students and teachers in various disciplines who want to gain a broader and more integrated view of the nature and development of excellence through education **E-Learning as**

a Socio-Cultural System: A Multidimensional Analysis Zuzevičiūtė, Vaiva, Butrimė, Edit, Vitkutė-Adžgauskienė, Daiva, Vladimirovich Fomin, Vladislav, Kikis-Papadakis, Kathy, 2014-06-30 Information and communication technologies play a crucial role in a number of modern industries Among these education has perhaps seen the greatest increases in efficiency and availability through Internet based technologies E Learning as a Socio Cultural System A Multidimensional Analysis provides readers with a critical examination of the theories models and best practices in online education from a social perspective evaluating blended distance and mobile learning systems with a focus on the interactions of their practitioners Within the pages of this volume teachers students administrators policy makers and IT professionals will all find valuable advice and enriching personal experiences in the field of online education **Introduction to Language Pathology** David

Crystal, Rosemary Varley, 2013-07-12 This new edition includes the introduction of the WHO distinctions between impairment disability and handicap an increased focus on information processing approaches to language disorders and the introduction of revision questions as well as tutorial activities at the end of every chapter to support student learning *The Johns*
