Exercise 1.2

6

- 7 The student would need to use an oil bath (in place of the water bath) so that the higher temperature could be reached.
- 8 The substance is freezing (solidifying) / turning from liquid to solid.
- 9 The temperature stays constant because energy is being released as the substance solidifies / the molecules are giving out heat as they stop moving from place to place and become organised in a structured lattice arrangement / in the solid the molecules can only vibrate about fixed points / the heat released by the formation of new interactions (forces) between the particles keeps the temperature constant until all the substance is solid.

Sharp, Vicki F. Sharp, 1998 Originally published in 1973 *Black Players* was the first book to do a thorough examination of the urban pimp culture. Social anthropologists Richard and Christina Milner were allowed access to the secretive and controversial world of pimps and prostitutes. *Black Player* guides the reader through every aspect of this unfamiliar world, allowing the Players to describe themselves and the rules of the game in their own words. The Milners interviewed many of the top pimps in the Bay area and other parts of the country during the late 60s and early 70s. There is even a rare interview with legendary pimp turned author Iceberg Slim in this book. Out of this experience has come one of the most fascinating journeys into a secret culture ever written.
