11. A soccer player kicked a ball for the goal. The ball is launched from the ground with the launch angle of 30° . The launch is 20 m away from the goal. The ball is launched with an initial velocity of 10 m/s.

a) Write the equations to model the path of the ball.

$$\begin{aligned}
 x &= 10t \cos 30^\circ \\
 y &= 10t \sin 30^\circ - 4.9t^2
 \end{aligned}$$

- b) How high does the ball go? Is the ball in the goal? (Yes/No) (How many seconds does it take to reach the goal?)

- c) Is this player's kick higher than the goal? (Yes/No) (How many seconds does it take to reach the goal?)

- d) Does the ball reach the goal? (Yes/No) (How many seconds does it take to reach the goal?)

12. A basketball player is 2.0 m tall. He is 10 m away from the basket. The basket is 3.0 m high. The player is 1.8 m tall. The ball is launched from the player's hands at an angle of 45° .

a) Write the equations to model the path of the ball.

$$\begin{aligned}
 x &= 10t \cos 45^\circ \\
 y &= 10t \sin 45^\circ - 4.9t^2
 \end{aligned}$$

- b) How high does the ball go? Is the ball in the basket? (Yes/No) (How many seconds does it take to reach the basket?)

- c) What is the height of the basket? Is the ball in the basket? (Yes/No) (How many seconds does it take to reach the basket?)

Precalculus Hs Mathematics Unit Lesson Test:

Teaching and Learning High School Mathematics Charlene E. Beckmann, Denisse R. Thompson, Rheta N. Rubenstein, 2009-11-02 Too many high school students faced with mathematics in courses at the level of algebra and beyond find themselves struggling with abstract concepts and unwilling to pursue further study of mathematics When students curtail their course taking in mathematics they may be impacting their college and career options Thus high school mathematics teachers have the responsibility to help students recognize the value and importance of mathematics while also designing instruction that makes mathematics accessible to all students Ball and Bass 2000 as well as other mathematics educators have recognized that mathematics teachers not only need to know mathematics content and mathematics pedagogy i e teaching strategies but they also need to know how these ideas are integrated This mathematical knowledge for teaching is the knowledge that teachers of mathematics need and it differs from the knowledge that research or applied mathematicians must know This text is designed to provide teachers with insights into this mathematical knowledge for teaching Teaching and Learning High School Mathematics is likely different from many other texts that you have used It integrates both content and pedagogy to help you develop and build your own understanding of teaching The text is designed to help you develop deep conceptual understanding of fundamental mathematics Ma 1999 so that you are able to approach mathematics from multiple perspectives with many tools Such flexibility in teaching is essential if teachers are to help all students become mathematically proficient Throughout this book you are encouraged to work in cooperative teams This strategy is designed to help you develop a mathematics learning community and build a professional network that will be a valuable resource during your professional career Hopefully you will experience the benefits of engaging in rich mathematical discussions with peers and consider how to encourage such learning environments in your own classrooms Lesson planning is another element pervasive throughout this text To help teachers plan for effective student centered lessons the Question Response Support QRS Guide is introduced in Lesson 1 1 and used throughout the remainder of the lessons The QRS Guide is a tool on which teachers may record tasks or questions Q for students expected and observed student responses R and teacher support S in the form of additional just enough questions to support students in their progress on the task In each unit teachers expand their repertoire of teaching and learning elements and strategies and incorporate these elements as they plan additional lesson segments In Unit 4 lesson planning is formally introduced as teachers put together elements from previous units into complete cohesive lesson plans **Directory of Distance**

Edition of the Core-Plus Mathematics Curriculum Harold Schoen,Steven W. Ziebarth,Christian R. Hirsch,Allison
BrckaLorenz,2010-07-01 The study reported in this volume adds to the growing body of evaluation studies that focus on the
use of NSF funded Standards based high school mathematics curricula Most previous evaluations have studied the impact of
field test versions of a curriculum Since these innovative curricula were so new at the time of many of these studies students

and teachers were relative novices in their use These earlier studies were mainly one year or less in duration Students in the comparison groups were typically from schools in which some classes used a Standards based curriculum and other classes used a conventional curriculum rather than using the Standards based curriculum with all students as curriculum developers intended The volume reports one of the first studies of the efficacy of Standards based mathematics curricula with all of the following characteristics The study focused on fairly stable implementations of a first edition Standards based high school mathematics curriculum that was used by all students in each of three schools It involved students who experienced up to seven years of Standards based mathematics curricula and instruction in middle school and high school It monitored students mathematical achievement beliefs and attitudes for four years of high school and one year after graduation Prior to the study many of the teachers had one or more years of experience teaching the Standards based curriculum and or professional development focusing on how to implement the curriculum well In the study variations in levels of implementation of the curriculum are described and related to student outcomes and teacher behavior variables Item data and all unpublished testing instruments from this study are available at www.wmich.edu/cmp for use as a baseline of instruments and data for future curriculum evaluators or Core Plus Mathematics users who may wish to compare results of new groups of students to those in the present study on common tests or surveys Taken together this volume the supplement at the CPMP Web site and the first edition Core Plus Mathematics curriculum materials samples of which are also available at the Web site serve as a fairly complete description of the nature and impact of an exemplar of first edition NSF funded Standards based high school mathematics curricula as it existed and was implemented with all students in three schools around the turn of the 21st century

It Pays to be an Engineer, 1985 **Time for Learning** Kathleen P. Fulton, 2014-05-22 The guide school leaders need to reap the rewards of education s most exciting new trend Flipping classrooms using class time for hands on learning and off loading the lecture portion of lessons to teacher created videos or other technology presentations assigned as homework is taking schools by storm But like all hot trends it is important to apply this innovation intelligently especially at the system wide level This book makes a persuasive case to leaders for the potential benefits of flipping Backed by powerful data and compelling anecdotes this book covers Data on positive student outcomes in terms of achievement and motivation How flipping gives teachers more time to work with students one on one and encourage peer learning Ways flipping can benefit teacher learning and collaboration Why flipping encourages students to take responsibility for their own learning How flipping engages students in 21st century skills Ways flipping is budget and resource friendly With this book you can take a major step towards the future of education utilizing technology and advanced understanding of how students learn best Flipped classrooms empower teachers to engage students in deeper learning This book gives readers ten reasons for joining forces to make this possibility a reality Tom Carroll President National Commission on Teaching and America s Future I highly recommend this book for any educator interested in flipping the classroom to reinvent the learning process
