### **Handbook of Artificial Intelligence in Biomedical Engineering** Saravanan Krishnan, Ramesh

Kesavan, B. Surendiran, G.S. Mahalakshmi, 2021-03-29 Handbook of Artificial Intelligence in Biomedical Engineering focuses on recent AI technologies and applications that provide some very promising solutions and enhanced technology in the biomedical field Recent advancements in computational techniques such as machine learning Internet of Things IoT and big data accelerate the deployment of biomedical devices in various healthcare applications This volume explores how artificial intelligence AI can be applied to these expert systems by mimicking the human expert's knowledge in order to predict and

monitor the health status in real time The accuracy of the AI systems is drastically increasing by using machine learning digitized medical data acquisition wireless medical data communication and computing infrastructure AI approaches helping to solve complex issues in the biomedical industry and playing a vital role in future healthcare applications The volume takes a multidisciplinary perspective of employing these new applications in biomedical engineering exploring the combination of engineering principles with biological knowledge that contributes to the development of revolutionary and life saving concepts

**Handbook of Genetic Programming Applications** Amir H. Gandomi, Amir H. Alavi, Conor Ryan, 2015-11-06 This contributed volume written by leading international researchers reviews the latest developments of genetic programming GP and its key applications in solving current real world problems such as energy conversion and management financial analysis engineering modeling and design and software engineering to name a few Inspired by natural evolution the use of GP has expanded significantly in the last decade in almost every area of science and engineering Exploring applications in a variety of fields the information in this volume can help optimize computer programs throughout the sciences Taking a hands on approach this book provides an invaluable reference to practitioners providing the necessary details required for a successful application of GP and its branches to challenging problems ranging from drought prediction to trading volatility It also demonstrates the evolution of GP through major developments in GP studies and applications It is suitable for advanced students who wish to use relevant book chapters as a basis to pursue further research in these areas as well as experienced practitioners looking to apply GP to new areas The book also offers valuable supplementary material for design courses and computation in engineering

Proceedings of International Conference on Information Technology and Applications Abrar Ullah, Sajid Anwar, Davide Calandra, Raffaele Di Fuccio, 2024-03-17 This book includes high quality papers presented at 17th International Conference on Information Technology and Applications ICITA 2023 held in Turin Italy during 20-22 October 2023 The book presents original research work of academics and industry professionals to exchange their knowledge of the state of the art research and development in information technology and applications The topics covered in the book are cloud computing business process engineering machine learning evolutionary computing big data analytics internet of things and cyber physical systems information and knowledge management computer vision and image processing computer graphics and games programming mobile computing ontology engineering software and systems modelling human computer interaction online learning e learning computer networks and web engineering

*Biotechnology for Pulp and Paper Processing* Pratima Bajpai, 2018-02-14 The book provides the most up to date information available on various biotechnological processes useful in the pulp and paper industry The first edition was published in 2011 covering a specific biotechnological process or technique discussing the advantages limitations and prospects of the most important and popular processes used in the industry Many new developments have taken place in the last five years warranting a second edition on this topic The new edition contains about 35% new material covering topics in Laccase application in fibreboard

biotechnology in forestry pectinases in papermaking stickies control with pectinase products from hemicelluloses value added products from biorefinery lignin use of enzymes in mechanical pulping

**Elementary Mathematical Models: An Accessible Development without Calculus, Second Edition** Dan Kalman, Sacha Forgoston, Albert Goetz, 2019-08-02  
 Elementary Mathematical Models offers instructors an alternative to standard college algebra quantitative literacy and liberal arts mathematics courses Presuming only a background of exposure to high school algebra the text introduces students to the methodology of mathematical modeling which plays a role in nearly all real applications of mathematics A course based on this text would have as its primary goal preparing students to be competent consumers of mathematical modeling in their future studies Such a course would also provide students with an understanding of the modeling process and a facility with much of the standard non trigonometric content of college algebra and precalculus This book builds successively a series of growth models defined in terms of simple recursive patterns of change corresponding to arithmetic quadratic geometric and logistic growth Students discover and come to understand linear polynomial exponential and logarithmic functions in the context of analyzing these models of intrinsically and scientifically interesting phenomena including polar ice extent antibiotic resistance and viral internet videos Students gain a deep appreciation for the power and limitations of mathematical modeling in the physical life and social sciences as questions of modeling methodology are carefully and constantly addressed Realistic examples are used consistently throughout the text and every topic is illustrated with models that are constructed from and compared to real data The text is extremely attractive and the exposition is extraordinarily clear The lead author of this text is the recipient of nine MAA awards for expository writing including the Ford Evans Plya and Allendoerfer awards and the Beckenbach Book prize Great care has been taken by accomplished expositors to make the book readable by students Those students will also benefit from more than 1 000 carefully crafted exercises

**Macro-Level Learning through Massive Open Online Courses (MOOCs): Strategies and Predictions for the Future** McKay, Elspeth, Lenarcic, John, 2015-03-31 To some in academia Massive Open Online Courses are a paradigm shift in online education while others perceive them as a threat to traditional styles of pedagogy In this regard the time honored model of the university lecture is seen as being a potential casualty of the rise of MOOCs Macro Level Learning through Massive Open Online Courses MOOCs Strategies and Predictions for the Future provides insight into the emerging phenomenon of MOOCs as a design manual for the course designer with a collection of chapters that deal with all facets of the MOOC debate Industry training developers corporate trainers educators post graduate students and others will benefit from the information provided in this book

**Bioinformatics Algorithms** Miguel Rocha, Pedro G. Ferreira, 2018-06-08  
 Bioinformatics Algorithms Design and Implementation in Python provides a comprehensive book on many of the most important bioinformatics problems putting forward the best algorithms and showing how to implement them The book focuses on the use of the Python programming language and its algorithms which is quickly becoming the most popular

language in the bioinformatics field Readers will find the tools they need to improve their knowledge and skills with regard to algorithm development and implementation and will also uncover prototypes of bioinformatics applications that demonstrate the main principles underlying real world applications Presents an ideal text for bioinformatics students with little to no knowledge of computer programming Based on over 12 years of pedagogical materials used by the authors in their own classrooms Features a companion website with downloadable codes and runnable examples such as using Jupyter Notebooks and exercises relating to the book

**16th International Conference on Information Technology-New Generations (ITNG 2019)** Shahram Latifi,2019-05-22 This 16th International Conference on Information Technology New Generations

ITNG continues an annual event focusing on state of the art technologies pertaining to digital information and communications The applications of advanced information technology to such domains as astronomy biology education geosciences security and health care are among topics of relevance to ITNG Visionary ideas theoretical and experimental results as well as prototypes designs and tools that help the information readily flow to the user are of special interest Machine Learning Robotics High Performance Computing and Innovative Methods of Computing are examples of related topics The conference features keynote speakers the best student award poster award service award a technical open panel and workshops exhibits from industry government and academia

*Transdisciplinary Solutions for Sustainable Development* Mark Charlesworth,2015-05-15 Global environmental issues such as climate change and species loss are intensifying despite our best efforts to combat them The key reason for this is that the drivers of these problems are closely linked to the industrialism and consumerism that are promoted by governments and other organizations the world over This innovative book identifies the key issues that block progress in sustainable development and proposes transdisciplinary solutions Presenting a review of the epistemology and ethics of this policy field including current policy responses it examines the ethical and policy implications from a multidisciplinary perspective The book explains the current limitations of scientific prediction for global environmental issues and develops innovative approaches to respond to these difficulties drawing out lessons that will make sustainable development policy more democratic plural and open This book will be of great interest to students and researchers in environmental policy development studies politics economics and sustainable development

**Machine Learning and AI in Finance** German Creamer,Gary Kazantsev,Tomaso Aste,2021-04-05 The significant amount of information available in any field requires a systematic and analytical approach to select the most critical information and anticipate major events During the last decade the world has witnessed a rapid expansion of applications of artificial intelligence AI and machine learning ML algorithms to an increasingly broad range of financial markets and problems Machine learning and AI algorithms facilitate this process understanding modelling and forecasting the behaviour of the most relevant financial variables The main contribution of this book is the presentation of new

theoretical and applied AI perspectives to find solutions to unsolved finance questions This volume proposes an optimal model for the volatility smile for modelling high frequency liquidity demand and supply and for the simulation of market microstructure features Other new AI developments explored in this book includes building a universal model for a large number of stocks developing predictive models based on the average price of the crowd forecasting the stock price using the attention mechanism in a neural network clustering multivariate time series into different market states proposing a multivariate distance nonlinear causality test and filtering out false investment strategies with an unsupervised learning algorithm Machine Learning and AI in Finance explores the most recent advances in the application of innovative machine learning and artificial intelligence models to predict financial time series to simulate the structure of the financial markets to explore nonlinear causality models to test investment strategies and to price financial options The chapters in this book were originally published as a special issue of the Quantitative Finance journal

**Business Analytics for Professionals** Alp Ustundag, Emre Cevikcan, Omer Faruk Beyca, 2022-05-09 This book explains concepts and techniques for business analytics and demonstrate them on real life applications for managers and practitioners It illustrates how machine learning and optimization techniques can be used to implement intelligent business automation systems The book examines business problems concerning supply chain marketing CRM financial manufacturing and human resources functions and supplies solutions in Python

**Artificial Intelligence in Drug Discovery** Nathan Brown, 2020-11-04 Following significant advances in deep learning and related areas interest in artificial intelligence AI has rapidly grown In particular the application of AI in drug discovery provides an opportunity to tackle challenges that previously have been difficult to solve such as predicting properties designing molecules and optimising synthetic routes Artificial Intelligence in Drug Discovery aims to introduce the reader to AI and machine learning tools and techniques and to outline specific challenges including designing new molecular structures synthesis planning and simulation Providing a wealth of information from leading experts in the field this book is ideal for students postgraduates and established researchers in both industry and academia

**New Developments in Environmental and Energy Technologies** Jan Baeyens, Raf Dewil, Barbara Rossi, Yimin Deng, 2025-03-27 This book presents the selected papers from the 2023 5th International Conference on Environmental Sciences and Renewable Energy ESRE 2023 which was held as a hybrid conference during June 19 21 2023 in Vienna Austria The book includes first rate original research on various aspects of environmental sciences and renewable energy offering perspectives from industrial and research communities to address current challenges in related fields In the field of environmental science wastewater and sludge treatment air pollution and control global environmental change and ecosystems management are discussed In the area of renewable energy several hot topics are presented including solar energy energy conservation and recovery and hydrogen generation and application This book supports the transfer of vital knowledge to next generation researchers students and practitioners in academia and industry

**Advances in Acoustics**

**and Vibration** Tahar Fakhfakh, Fakher Chaari, Lasaad Walha, Moez Abdennadher, Mohamed Slim Abbes, Mohamed Haddar, 2016-09-01 The book provides readers with a snapshot of recent research and industrial trends in field of industrial acoustics and vibration Each chapter accepted after a rigorous peer review process reports on a selected original piece of work presented and discussed at International Conference on Acoustics and Vibration ICAV2016 which was organized by the Tunisian Association of Industrial Acoustics and Vibration ATAVI and held March 21 23 in Hammamet Tunisia The contributions mainly written by north African authors covers advances in both theory and practice in a variety of subfields such as smart materials and structures fluid structure interaction structural acoustics as well as computational vibro acoustics and numerical methods Further topics include engines control noise identification robust design flow induced vibration and many others This book provides a valuable resource for both academics and professionals dealing with diverse issues in applied mechanics By combining advanced theories with industrial issues it is expected to facilitate communication and collaboration between different groups of researchers and technology users

Pattern Recognition Shivakumara Palaiahnakote, Gabriella Sanniti di Baja, Liang Wang, Wei Qi Yan, 2020-02-22 This two volume set constitutes the proceedings of the 5th Asian Conference on ACPR 2019 held in Auckland New Zealand in November 2019 The 9 full papers presented in this volume were carefully reviewed and selected from 14 submissions They cover topics such as classification action and video and motion object detection and anomaly detection segmentation grouping and shape face and body and biometrics adversarial learning and networks computational photography learning theory and optimization applications medical and robotics computer vision and robot vision pattern recognition and machine learning multi media and signal processing and interaction
