**Roots of the Scientific Revolution** Gideon Freudenthal,Peter McLaughlin,2009-05-20 The texts of Boris Hessen and Henryk Grossmann assembled in this volume are important contributions to the historiography of the Scientific Revolution

and to the methodology of the historiography of science They are of course also historical documents not only testifying to Marxist discourse of the time but also illustrating typical European fates in the first half of the twentieth century Hessen was born a Jewish subject of the Russian Czar in the Ukraine participated in the October Revolution and was executed in the Soviet Union at the beginning of the purges Grossmann was born a Jewish subject of the Austro Hungarian Kaiser in Poland and served as an Austrian officer in the First World War afterwards he was forced to return to Poland and then because of his revolutionary political activities to emigrate to Germany with the rise to power of the Nazis he had to flee to France and then America while his family which remained in Europe perished in Nazi concentration camps Our own acquaintance with the work of these two authors is also indebted to historical context under incomparably more fortunate circumstances the revival of Marxist scholarship in Europe in the wake of the student movement and the professionalization of history of science on the Continent We hope that under the again very different conditions of the early twenty first century these texts will contribute to the further development of a philosophically informed socio historical approach to the study of science
