have made the significant impression it did on other ancient cultures such as Greece and Rome Neolithic means the new stone age even though agriculture was the crowning achievement of the period Civilizations started out small Agriculture at first tended to tie only small groups together These groups also all settled along rivers important as a reliable and predictable source of water As time passed families usually worked the same plot of land over successive generations leading to the concept of ownership Ancient mortars and grinding tools unearthed in a large mound in the Zagros Mountains of Iran reveal that people were grinding wheat and barley about 11 000 years ago Grass pea wild wheat wild barley and lentils were found throughout the site including some of the earliest known samples This was much further east than most sites known for early agriculture This book furnishes with utmost facility to all classes of readers the needed information on ancient civilization The unusual variety of the subject makes this a work of endless fascination World Prehistory Brian M.
