Place Meant Hermeneutic Landscapes Of The Spatial Self:

Place Meant G. V. Loewen, 2014-12-16 What does place mean for human beings What does it mean to exist in space How do we place ourselves not only in physical space but within the interior landscape of consciousness Place Meant is an interdisciplinary exploration of these and related questions through the lenses of psychoanalysis sociology anthropology geography folklore memoir and the history of ideas It will be of interest to anyone who has traveled the earth and pondered their relationship to home away and the world at large

Place, Space and Hermeneutics Bruce B. Janz, 2017-03-29 This book analyzes the hermeneutics of place raising questions about central issues such as textuality dialogue and play It discusses the central figures in the development of hermeneutics and place and surveys disciplines and areas in which a hermeneutic approach to place has been fruitful It covers the range of philosophical hermeneutic theory both within philosophy itself as well as from other disciplines In doing so the volume reflects the state of theorization on these issues and also looks forward to the implications and opportunities that exist Philosophical hermeneutics has fundamentally altered philosophy's approach to place Issues such as how we dwell in place how place is imagined created preserved and lost and how philosophy itself exists in place have become central While there is much research applying hermeneutics to place there is little which both reflects on that heritage and critically analyzes a hermeneutic approach to place This book fills that void by offering a sustained analysis of the central elements major figures and disciplinary applications of hermeneutics and place

Landscape and the Visual Hermeneutics of Place, 1500-1700 Karl A.E. Enenkel, Walter Melion, 2020-12-29 This volume examines the image based methods of interpretation that pictorial and literary landscapists employed between 1500 and 1700 The seventeen essays ask how landscape construed as the description of place in image and or text more than merely inviting close viewing was often seen to call for interpretation or better for the application of a method or principle of interpretation Contributors Boudewijn Bakker William M Barton Stijn Bussels Reindert Falkenburg Margaret Goehring Andrew Hui Sarah McPhee Luke Morgan Shelley Perlove Kathleen P Long Lukas Reddemann Denis Ribouillault Paul J Smith Troy Tower and Michel Weemans

Environmental Hermeneutics in the Anthropocene David Utsler, Forrest Clingerman, Brian Treanor, 2025-10-15 Environmental Hermeneutics in the Anthropocene is a diverse collection of essays that approach contemporary environmental problems with the tools and perspectives provided by the tradition of philosophical hermeneutics advanced by philosophers such as Martin Heidegger Hans Georg Gadamer and Paul Ricoeur Engaging both established and new voices this book presents a significant contribution to the field by expanding the scope of philosophical hermeneutics to environmental issues It addresses a broad scope of environmental topics such as the Anthropocene climate change degrowth environmental justice the limits of language in understanding nature and environmental aesthetics in environmental practice Together the chapters show the crisis of regional and global environmental problems to be in part a crisis of interpretation The ways that human beings understand their relationship to environments shape and determine how

to act and live within places Yet the values and ideals that different people have about their lived environments often come into conflict Thus hermeneutics plays an important role in environmental discourse it helps adjudicate these conflicting understandings This collection of essays demonstrates the unique way that environmental hermeneutics can be employed to understand environments in this age of the Anthropocene It will appeal to researchers and upper level students in environmental humanities environmental studies ethics and philosophy

Philosophical Hermeneutics and the Architecture of Álvaro Siza Sally J. Faulder, 2024-12-30 This book presents an original study of the work of Pritzker Prize winning Portuguese architect lvaro Siza from the perspective of architecture as an interpretation of human life It combines philosophical hermeneutics narrative textual description and history and theory research to provide a rich account of Siza s work The book gives a detailed analysis of three of Siza s works from this perspective the Tidal Pool Piscina das Mar s in Le a da Palmeira Portugal the Galician Centre of Contemporary Art Centro Galego de Arte Contempor nea in Santiago de Compostela Spain and the Santa Maria Church in Marco de Canaveses Portugal This form of analysis provides insight into the unique temporal dimension of Siza s work both in the memory inscribed by the structure and in how what is inscribed is revealed by degrees to those who come into contact with it Drawing on Hans Georg Gadamer and Paul Ricoeur this book defines both building and inhabiting as acts of interpretation Through employing the technique of writing architecture as a mode of phenomenological description the book uses one form of creative configuration narrative to draw out the meaning inscribed in another form of creative configuration architecture The book contributes a unique perspective to scholarship on Siza and an in depth study to the growing field of hermeneutics of architecture It will be of interest to researchers and students of architecture and philosophy

Hermeneutics of Human-Animal Relations in the Wake of Rewilding Mateusz Tokarski, 2019-05-21 In consequence of significant social political economic and demographic changes several wildlife species are currently growing in numbers and recolonizing Europe While this is rightly hailed as a success of the environmental movement the return of wildlife brings its own issues As the animals arrive in the places we inhabit we are learning anew that life with wild nature is not easy especially when the accumulated cultural knowledge and experience pertaining to such coexistence have been all but lost This book provides a hermeneutic study of the ways we come to understand the troubling impacts of wildlife by exploring and critically discussing the meanings of ecological discomforts Thus it begins the work of rebuilding the culture of coexistence The cases presented in this book range from crocodile attacks to mice infestations and their analysis consequently builds up an ethics that sees wildlife as active participants in the shaping of human moral and existential reality This book is of interest not only to environmental philosophers who will find here an original contribution to the established ethical discussions but also to wildlife managers and even to those members of the public who themselves struggle to make sense of encounters with their new wild neighbors

An Alternative Approach to Family Business Ericson, Mona, 2021-10-12 This insightful and innovative book proposes a new theory of

socio material weaving for studying and understanding family business It dissolves the family business into activities constituted of the sociality of human interactions and relations and interwoven with materials that extend in both a bodily lived and spatial existential sense

Experiential Landscape Kevin Thwaites, Ian Simkins, 2006-12-05 Experiential Landscape offers new ways of looking at the relationship between people and the outdoor open spaces they use in their everyday lives The book takes a holistic view of the relationship between humans and their environment integrating experiential and spatial dimensions of the outdoors and exploring the theory and application of environmental design disciplines most notably landscape architecture and urban design The book explores specific settings in which an experiential approach has been applied setting out a vocabulary and methods of application and offers new readings of experiential characteristics in site analysis and design Offering readers a range of accessible mapping tools and details of what participative approaches mean in practice this is a new innovative and practical methodology The book provides an invaluable resource for students academics and practitioners and anyone seeking reflective but practical guidance on how to approach outdoor place making or the analysis and design of everyday outdoor places

Placing Nature on the Borders of Religion, Philosophy and Ethics Dr Forrest Clingerman, Mr Mark H Dixon, 2013-06-28 The natural world has been humanized even areas thought to be wilderness bear the marks of human impact But this human impact is not simply physical At the emergence of the environmental movement the focus was on human effects on nature More recently however the complexity of the term nature has led to fruitful debates and the recognition of how human individuals and cultures interpret their environments This book furthers the dialogue on religion ethics and the environment by exploring three interrelated concepts to recreate to replace and to restore Through interdisciplinary dialogue the authors illuminate certain unique dimensions at the crossroads between finding value creating value and reflecting on one's place in the world Each of these terms has diverse religious ethical and scientific connotations Each converges on the ways in which humans both think about and act upon their surroundings And each radically questions the damaging conceptual divisions between nature and culture human and environment and scientific explanation and religious ethical understanding This book self consciously reflects on the intersections of environmental philosophy environmental theology and religion and ecology stressing the importance of how place interprets us and how we interpret place In addition to its contribution to environmental philosophy this work is a unique volume in its serious engagement with theology and religious studies on the issues of ecological restoration and the meaning of place

A Transdisciplinary, Engaged, Phenomenological Investigation of Dwelling and Landscape Language Andrew Turk, 2024-09-06 This book includes revised dissertation chapters from the author's second PhD which was awarded in 2020 by Murdoch University Australia It also includes three chapters summarising recent developments This was an innovative transdisciplinary research project using phenomenology as the overarching meta paradigm The investigation involved collaborations and literature reviews across numerous disciplines including philosophy

geography ethnoecology sociology and cultural studies The book discusses three landscape language ethnophysiography case studies with Indigenous peoples in Australia and the USA It features a detailed discussion of transdisciplinarity and provides a comprehensive example of how this approach can be applied to complex dwelling relationships which people from different cultures have with specific topographic environments turning terrain into landscape It involves using phenomenology as a transdisciplinary meta paradigm and describes phenomenological methods for integrating physical and social sciences including an analysis of the worldviews of Indigenous peoples for example Manyjilyjarra Jukurrpa as Heideggerian topology

Place, Space, and Landscape in Medieval Narrative Laura L. Howes, 2007 This collection contains essays from thirteen authors on topics ranging from an Old English transfiguration homily to Galbert of Bruges Marie de France's *lais* Chaucer's gardens Boccaccio's *Decameron* and others In each of these chapters analyses of space map a variety of ways medieval narratives encoded meaning In some lost historical associations are uncovered In others a new way of theorizing space even seeing bodies and minds as spaces to be imagined or marked leads to interpretations that add significantly to our understanding of medieval narrative art In still others broadly political and ideological concerns find expression in the spatial world

Landscapes of a New Cultural Economy of Space Theano S. Terkenli, Anne-Marie d'Hautesserre, 2006-03-09 The purpose of the book is to tie together various perspectives insights and constructions pertaining to contemporary landscapes and landscape representations from different theoretical and methodological positions as well as from diverse geographical and historical contexts in order to elucidate and illustrate processes of cultural transformation inscribed in space The unifying theme as well as the main goal and prospective contribution then lies in the exploration of these developing forces and characteristics of the new cultural economy of space in the contemporary landscape's The primary objective of bringing together geographical perspectives from various subdisciplinary fields is to examine and discuss ways in which the complexities of this newly emerging cultural economy of space are applied on various sorts of landscapes i.e. urban and rural landscapes landscapes of everyday life landscapes of tourism and recreation postcolonial and hybrid landscapes landscapes of economic production landscapes of the street and of public life national landscapes and so on The overarching question thus is how do these processes work in different geographical contexts and contribute to place and landscape creation

Handbook of Landscape Archaeology Bruno David, Julian Thomas, 2016-06-03 Over 80 archaeologists from four continents create a benchmark volume of the ideas and practices of landscape archaeology covering the theoretical and the practical the research and conservation and encasing the term in a global framework

Mircea Eliade's Vision for a New Humanism David Cave, 1993-01-28 The influential scholar of religion Mircea Eliade envisioned a spiritually destitute modern culture coming into renewed meaning through the recovery of archetypal myths and symbols Eliade defined this restoration of meaning as a new humanism of existential meaning and cultural religious unity Through a biographical exegesis of Eliade's life and writings from his earliest years in Romania to his final ones as professor of the history of religions at the University

of Chicago Cave sets forward a structural description of what this new humanism might have meant for Eliade and what it signifies for modern culture Cave concludes by endorsing Eliade's radically pluralistic vision which he argues offers a key to the revitalization of our demythologized and material culture This study repositions previous Eliadean studies and places the new humanism as the paradigm in relation to which future readings of Eliade should be evaluated

[Ethics and Politics of Space for the Anthropocene](#) Anu Valtonen, Outi Rantala, Paolo D. Farah, 2020-10-30 Featuring an international multidisciplinary set of contributors this thought

provoking book reimagines established narratives of the Anthropocene to allow differences in regions and contexts to be taken seriously emphasising the importance of localised and situated knowledge It offers critical engagement with the debates around the Anthropocene by challenging the dominant techno rational agenda that often prevails in socio political and academic discussions

Digital Draw Connections Fabio Bianconi, Marco Filippucci, 2021-04-27 This book stems from the seminal work of Robert Venturi and aims at re projecting it in the current cultural debate by extending it to the scale of landscape and placing it in connection with representative issues It brings out the transdisciplinary synthesis of a necessarily interdisciplinary approach to the theme aimed at creating new models which are able to represent the complexity of a contradictory reality and to redefine the centrality of human dimension As such the volume gathers multiple experiences developed in different geographical areas which come into connection with the role of representation Composed of 43 chapters written by 81 authors from around the world with an introduction by Jim Venturi and Cezar Nicolescu the volume is divided into two parts the first one more theoretical and the other one which showcases real world applications although there is never a total split between criticism and operational experimentation of research

Southscapes Thadious M. Davis, 2011-11-21 In this innovative approach to southern literary cultures Thadious Davis analyzes how black southern writers use their spatial location to articulate the vexed connections between society and environment particularly under segregation and its legacies Basing her analysis on texts by Ernest Gaines Richard Wright Alice Walker Natasha Trethewey Olympia Vernon Brenda Marie Osbey Sybil Kein and others Davis reveals how these writers reconstitute racial exclusion as creative black space rather than a site of trauma and resistance Utilizing the social and political separation epitomized by segregation to forge a spatial and racial vantage point Davis argues allows these writers to imagine and represent their own subject matter and aesthetic concerns Focusing particularly on Louisiana and Mississippi Davis deploys new geographical discourses of space to expand analyses of black writers relationship to the South and to consider the informing aspects of spatial narratives on their literary production She argues that African American writers not only are central to the production of southern literature and new southern studies but also are crucial to understanding the shift from modernism to postmodernism in southern letters A paradigm shifting work Southscapes restores African American writers to their rightful place in the regional imagination while calling for a more inclusive conception of region

Roman Landscape: Culture and Identity Diana Spencer, 2010 This survey explores how and why Romans of the late Republic and early Principate were fascinated with landscaped nature Thematic discussions and case studies work through what landscape represented and how studying Roman identity in terms of place environment and the natural world helps us better to understand Rome itself
