Places Au Peuple:

Le Guide Musical, 1870, *An Algebraic Introduction to Complex Projective Geometry* Christian Peskine, 1843 In this introduction to commutative algebra the author chooses a route that leads the reader through the essential ideas without getting embroiled in technicalities He takes the reader quickly to the fundamentals of complex projective geometry requiring only a basic knowledge of linear and multilinear algebra and some elementary group theory The author divides the book into three parts In the first he develops the general theory of noetherian rings and modules He includes a certain amount of homological algebra and he emphasizes rings and modules of fractions as preparation for working with sheaves In the second part he discusses polynomial rings in several variables with coefficients in the field of complex numbers After Noether's normalization lemma and Hilbert's Nullstellensatz the author introduces affine complex schemes and their morphisms he then proves Zariski's main theorem and Chevalley's semi continuity theorem Finally the author's detailed study of Weil and Cartier divisors provides a solid background for modern intersection theory This is an excellent textbook for those who seek an efficient and rapid introduction to the geometric applications of commutative algebra *Historical Narrations in French*

Charles Picot, 1846 **The Pride of Place** Stephane Gerson, 2018-08-06 Nineteenth century France grew fascinated with the local past Thousands of citizens embraced local archaeology penned historical vignettes and monographs staged historical pageants and created museums and pantheons of celebrities St phane Gerson's rich elegantly written and timely book provides the first cultural and political history of what contemporaries called the cult of local memories an unprecedented effort to resuscitate the past instill affection for one's locality and hence create a sense of place A wide range of archival and printed sources some of them untapped until now inform the author's engaging portrait of a little known realm of Parisian entrepreneurs and middling provincials of obscure historians and intellectual luminaries Arguing that the local and modernity were interlaced rather than inimical between the 1820s and 1890s Gerson explores the diverse uses of local memories in modern France from their theatricality and commercialization to their political and pedagogical applications The Pride of Place shows that contrary to our received ideas about French nationhood and centralism the local buttressed the nation while seducing Parisian and local officials The state cautiously supported the cult of local memories even as it sought to co-opt them and grappled with their cultural and political implications The current enthusiasm for local memories Gerson thus finds is neither new nor a threat to Republican unity More broadly yet this book illuminates the predicament of countries that like France are now caught between supranational forces and a revival of local sentiments
