American Journal of Mining ,1867 **Origins of Universal Systems** Alexander Alan Scarborough,2008-09-19 When the right answers are found they will be simple and beautiful Einstein Paraphrasing Thomas Kuhn in his Structure of Scientific Revolutions there can be no change in direction of scientific thought unless there is a viable alternative Now after 35 years of persistent research the author s plethora of substantiated evidence offers science a valid alternative to the Big Bang the LB FLINE BEC model of universal origins one that fulfills Einstein s prediction and meets Kuhn s criteria In fulfilling both predictions the new model reveals a plethora of impossibilities comprising the Big Bang myth while forming powerful arguments for relegating the Big Bang to the ashes of history The revolutionary model a macroscopic theory of everything is ideal for a microscopic Theory of Everything Thomas Huxley stated it best The microcosm repeats the macrocosm a connection placing science in a favorable position for attaining the long sought Theory of Everything As long as the Big Bang Accretion hypotheses remain in vogue comprehending universal origins and functions will remain impossible In sharp contrast the new model alternative opens floodgates to definitive evidence of universal origins and functions Why in the Big Bang perspective substantiated solutions to universal anomalies will always remain unattainable while in the LB FLINE BEC perspective substantiated solutions to universal anomalies are readily attainable Three simple and beautiful examples out of many The dynamic fiery geometrical spacing of planets in elliptical orbits Why Pluto was originally the tenth planet in our Solar System and now is the ninth planet Why extra solar systems are weirdly different from our geometrically spaced Solar System **Journal of the British Astronomical Association** British Astronomical Association,1901 List of members 1890 1913 bound with v 1 23 **Unifying Heaven and Earth. Essays in the History of Early Modern Cosmology** Miguel Á. Granada,Patrick J. Boner & Dario Tessicini,2016-05-26 One of the most significant events in the history of Western civilization was the cosmological revolution of the 16th and 17th centuries Among the most salient factors in this change described by Alexandre Koyr as the destruction of the cosmos inherited from ancient Greece were Copernican heliocentrism and the substitution of a homogeneous universe for the hierarchical cosmos of the Platonic and Aristotelian tradition Starting with a new approach to the issue of the presence of Islamic astronomical devices in Copernicus work and a thorough reappraisal of the cosmological views of Paracelsus the book deals mainly with the abolition of cosmological dualism and the ways in which it affected the decline of astrology over the 17th century Other related topics include planetary order and theories of world harmony the cause of planetary motion in the Tyconic world system or the discussion on comets in Germany through the first presentation of a manuscript treatise by Michael Maestlin on the great comet of 1618
