Moral and Metaphysical Philosophy Frederick Denison Maurice, 1890 **Ancient philosophy and the first to the thirteenth centuries** Frederick Denison Maurice, 1873 **Moral and Metaphysical Philosophy** Frederick Denison Maurice, 1854 Philosophy of Education John Ryder, 2022-09-16 A 2023 Choice Reviews Outstanding Academic Title Assuming no background knowledge of philosophy John Ryder's introductory text surveys canonical writings and contemporary applications to inform future teachers practice of systematic philosophy of education Exposing readers to the philosophies that built Western education the book welcomes the development of alternate approaches through systematic analysis of how theory informs practice The book systematically analyzes key contributions by the four most influential

figures in the philosophy of Western education Plato Jean Jacques Rousseau John Dewey and Paolo Freire The book then builds on historical theories to help readers develop their own systematic philosophies of education After questions of why how by or for whom about what where and when education should be undertaken the book delves into metaphysical epistemological and socio political questions that may underlie educational principles Encouraging readers to practice a philosophy of education rather than follow a prescribed path the book presents a model of exploration that builds on ideas developed by philosophers such as Nel Noddings that can be applied across contemporary and emerging educational issues The analytic experience and conceptual background material of this book enables readers to think carefully and reflectively about educational principles policies and practices as they dedicate themselves to the profession of education     *The Logic of Information* Luciano Floridi, 2019-02-14 Luciano Floridi presents an innovative approach to philosophy conceived as conceptual design He explores how we make transform refine and improve the objects of our knowledge His starting point is that reality provides the data to be understood as constraining affordances and we transform them into information like semantic engines Such transformation or repurposing is not equivalent to portraying or picturing or photographing or photocopying anything It is more like cooking the dish does not represent the ingredients it uses them to make something else out of them yet the reality of the dish and its properties hugely depend on the reality and the properties of the ingredients Models are not representations understood as pictures but interpretations understood as data elaborations of systems Thus Luciano Floridi articulates and defends the thesis that knowledge is design and philosophy is the ultimate form of conceptual design Although entirely independent of Floridi s previous books *The Philosophy of Information* OUP 2011 and *The Ethics of Information* OUP 2013 *The Logic of Information* both complements the existing volumes and presents new work on the foundations of the philosophy of information
