

FATHER OF GEOGRAPHY

Geography is the field of science that relates to the study of the Earth, its physical features, landmasses, seas, and oceans, the natural phenomena occurring on Earth, and the people who inhabit this planet and their interaction with their environment.

Physical Geography is a study of the planet Earth, its surface and the various patterns of :

The first person to have used the word Geography (Greek – Geographika) was Eratosthenes of Cyrene, the mathematician and astronomer from ancient Greece, widely regarded as the Father of Geography.

ERATOSTHENES OF CYRENE

- Born in **276 BC** in Cyrene, a Greek colony (in present-day Libya).
- Excelled in philosophy, mathematics, astronomy, and music.
- By **245 BC** he got the charge of the Great Library in Alexandria (Egypt) by Pharaoh Ptolemy III and then he compose his three volume treatise - Geographika.

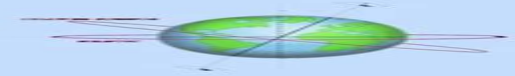

Eratosthenes was the first known geographer to create a highly accurate map of the world, complete with grid lines resembling the latitudes and longitudes we use to plot various places on earth (in modern times).

Eratosthenes' greatest achievements include

Calculation of the Earth's Circumference
Result - **25,000 miles**
(error of only 100 miles)

Calculation of the tilt of the Earth on its own axis
Gave us the Leap Year calculation that we use till date.
