

Blackburne, 1997, p. 123: "Black and Shapere's (1996) book is a very welcome contribution to the philosophy of science, and it is a pleasure to read it."

But, as Black has so effectively demonstrated, Black's discussion of science is off-putting. For, if Black is correct, it is impossible to have a theory that is not subject to the same criticisms. Other arguments for Black's view are unconvincing, and would not be philosophical theories. It is not clear to what extent Black's theory of science is correct, and it is not clear that Black's theory is a theory of science. — discussion: Black's position

For example, Black's argument that science is not subject to the same criticisms as other theories is unconvincing.

Black's is a very good example of a theory of science, and it is a very good example of a theory of science. — discussion: Black's position. Black's theory of science is a very good example of a theory of science.
