In this module, you will explore the relevance (i.e., the impact) of the humanities. How can the perspective of the humanities have a positive impact on your current or future professional career? That is, how could you make use of these principles in the workplace? If you have questions for other students, feel free to include them as part of your response.

In your responses to your peers, comment on the posts of two classmates who find the humanities beneficial in a different way than you do. Explain whether these benefits are universal or specific to a certain kind of field. Could the benefits your peers found aid you in your current or future job? Why or why not?

My future professional career is to become a psychologist/therapist. In order to do so, the humanities is a necessary component because I would need to be able to talk to others about different perspectives, certain issues they may be facing at the time, approaching situations with a critical eye, and much more. Having these skills in humanities will allow me to broach an understanding with my patients so that they are knowledgeable and comfortable enough to be open with me.

This doesn't just go for my future career path, but for all situations and jobs. The skills gained based in humanities will push everyone further in their goals by reinforcing critical thinking, perspectives, and empathy using the knowledge gained.
