Andrews,Pallatheri M. Subramanian,1992 Presents emerging technology and current research in plastics recycling Summarizes the scope of the problem of plastics recycling and highlights current areas of activity Includes discussion on stabilizers additives and characterization of recycled plastics polymer recovery and applications of recycled polymer blends Features an overview chapter by Wayne Pearson Executive Director of the Plastics Recycling Foundation Inc Precision Process Technology M.P.C. Weijnen,A.A.H. Drinkenburg,2012-12-06 New process technology strategies are required to cope with the future Fossil feedstocks are losing ground in favour of renewable feedstocks and secondary resources Conventional processing routes using thermal sledgehammer techniques are replaced by highly selective bio catalytic conversions The future process engineer is neither allowed to think in terms of unit operations nor to take for granted the conventional practice of continuous steady state processing Hybrid systems and transient operations are more and more frequently encountered The continuing impressive progress being made in process modelling and control will revolutionize the process industries In the new generation of chemical production processes the keyword is precision Precision in terms of selectivity and of efficiency is required to maximize the utilisation of materials and energy Moreover enhanced precision is needed to exploit the quality of materials and energy to the full extent Only by reducing the squandering of materials energy and quality will a harmonious relationship be established between the process industries the economy and the environment Process integration as well as an integrated effort by the disciplines involved in process technology will be of crucial importance in attaining the goals of precision process technology These emerging strategies involve an active exchange of tools and ideas between a variety of disciplines not only in plant design and operation but even more in the early stages of process development and design By looking from various angles at what the future has in store for the process industries this volume systematically lifts the corners of the veil and may inspire to establish a new tradition of precision in process technology **Official Gazette of the United States Patent and Trademark Office** ,1995 **Composite Materials, Friction Stir Welding, Green Concrete and Applied Research** Nicușor Alin Sîrbu,Amjad
