Consumerism and Prestige Anthony Enns, Bernhard Metz, 2022-07-05 This anthology explores the relationships and interdependencies between literary production and distinctions of taste by examining how the material aspects of literary texts such as the cover binding typography and paper stock reflect or even determine their cultural status In many cases for example the distinctions between highbrow and lowbrow taste have little to do with the content of the texts themselves as books often function as markers of socioeconomic status like clothing or home d cor One might even go so far as to say that the concept of literary taste is more closely related to fashion sense than critical judgment The anthology seeks to address this claim by examining how the tensions between consumerism and prestige reflect fundamental historical changes with regard to the development of technology literacy and social power

Education for Innovation and Independent Learning Ronaldo Mota, David Scott, 2014-01-24 Our principal concern in this book is to understand three important ideas learning technology and innovation and to examine these ideas and the relationships between them in situ that is we examine a number of cases of learning technologies in action in two countries England and Brazil The purpose of our study is to provide an explanation of the means to and constraints on improvements to educational policies and practices with particular reference to innovation We have a plethora of theoretical models that in attempting to

deal with causal relations usually come to the conclusion that there are socio economic cultural constraints but these observations largely remain at an abstract level and or come to very general conclusions that are not of particular help to practitioners in the field These issues can only be properly addressed after examining the empirical reality and having a spectrum of cases to analyze By combining the theoretical and the practical our aim is to explain how and under what conditions new modes of learning can be put into practice successfully and sustainably in order for the learner to develop innovatory skills and dispositions for work and in the life course
