

DSC-RX1R/B

Sony® Cyber-shot® DSC-RX1R Digital Still Camera

Discover astonishing picture clarity and fine-tuned performance without the optical low-pass filter (OLPF). In a land where detail is king, we've completely maxed out image sharpness by removing the OLPF. What's left is a full-frame, 24.3-megapixel marvel that captures amazing detail resolution—and fits right in your pocket.

Key Features

24.3 MP 35 mm Full Frame Sensor

A whole new world of high-quality images are realized through the 24.3 MP effective 35 mm full-frame sensor, a normal sensor range of ISO 100 – 25600, and a sophisticated balance of high resolving power, gradation and low noise. The BIONZ® image processor enables up to 5 fps high-speed continuous shooting and 14-bit RAW image data recording.

DSC-RX1R: Ultimate resolution

The RX1R is a special edition of the RX1 for photographers who want to take full advantage of the sensor's capabilities, and whose workflow normally includes computer based post-processing. The optical low-pass (anti-aliasing) filter that is built into the RX1 to minimize the occurrence of moiré and color artifacts has been removed from the RX1R, allowing the full resolution of the sensor to be achieved without compromise. The RX1R takes RX1 resolution to the limit.

Bright F2.0 Carl Zeiss® Sonnar T* lens

Carl Zeiss® lens expertise meets Sony optical precision in a sophisticated large-aperture lens that earns the coveted "Sonnar" name by offering remarkable brightness reminiscent of the sun. Whether taking casual snapshots, highly precise close-ups, or seriously composed landscapes and portraits, the Carl Zeiss Sonnar T* 35mm F2.0 fixed focal length lens ensures exceptional image quality.

Full HD 24p video and stereo input

Create movies of amazing clarity at Full HD resolution with manual control and stereo recording. Movies can be recorded at 60p for super smooth playback or 24p for a cinematic look. You can also use P/A/S/M modes to expand your moviemaking creativity. The DSC-RX1R Multi-interface shoe has been upgraded to record stereo sound when using the optional ECM-XYS11M external microphone.

Amazing Low-light performance

Experience incredible low-light shooting without a flash. The camera captures six images in a fraction of a second. Combining the data from all six, it creates a single image with a reduction in noise equivalent to two additional stops of ISO sensitivity. Sensitivity selectable up to ISO 25600. (Recommended for still subjects.)

High speed Auto Focus

Focus fast as with high speed AF. To improve focusing speed and sensitivity, the Exmor® CMOS sensor uses its rapid throughput to deliver high-quality image signals to the camera's BIONZ® processor, which provides intelligent response data to a new high speed actuator motor in the lens. The result is fast, DSLR-like focusing speeds even in low light.

Full frame burst shooting

When subjects are moving quickly, you can capture the decisive moment by shooting continuously at 5 frames per second — while maintaining maximum image quality at full 24.3 effective megapixel (approx.) resolution made possible by the BIONZ® image processor.

Three control lens rings

Full manual operation is intuitive on the RX1. Users can keep their eyes on the subject and concentrate on the composition while comfortably adjusting the dedicated aperture, focusing, and macro switching rings.

Conveniently placed dials

Quick access to conveniently placed exposure compensation and focus mode dials.

TRILUMINOS Color

The DSC-RX1R support Sony's proprietary TRILUMINOS Color technology, allowing you to experience photos and movies in rich, natural colors on any TV equipped with a TRILUMINOS Display. The expanded color gamut immerses you in those unforgettable colorful moments, from the complex shades in a shimmering blue sky to the delicate skin in a baby's face.
