A Broadband Apparatus for Underserved Remote Communities Christoffel Kotze, 2019-09-03 This book investigates how broadband internet can be provided to remote and isolated communities through the use of satellite and other enabling technologies in the form of a self contained broadband apparatus It discusses how the proposed design can help bridge the digital divide by removing one of the main hurdles to adopting technologies infrastructure In turn the book explores how the lack of infrastructure especially with regard to connectivity and electricity can be addressed by exploiting new technological advances in a number of fields notably the newly proposed large broadband satellite constellations In closing it uses concrete examples to demonstrate the potential positive impacts of a broadband ecosystem on economics governance and society and on achieving the United Nations Sustainable Development Goals *Popular Photography* , 1989-06 *The Immersive Enclosure* Paul Roquet, 2022-05-24 Winner 2023 Lewis Mumford Award for Outstanding Scholarship in the Ecology of Technics Media Ecology Association Although virtual reality promises to immerse a person in another world its true power lies in its ability to sever a person s spatial situatedness in this one This is especially clear in Japan where the VR headset has been embraced as a way to block off existing social environments and reroute perception into more malleable virtual platforms Is immersion just another name for enclosure In this groundbreaking analysis of virtual reality Paul Roquet uncovers how the technology is reshaping the politics of labor gender home and nation He examines how

VR in Japan diverged from American militarism and techno utopian visions and became a tool for renegotiating personal space. Individuals turned to the VR headset to immerse themselves in three dimensional worlds drawn from manga video games and genre literature. The Japanese government promised VR operated robots would enable a new era of remote work targeting those who could not otherwise leave home. Middle aged men and corporate brands used VR to reimagine themselves through the virtual bodies of anime styled teenage girls. At a time when digital platforms continue to encroach on everyday life, *The Immersive Enclosure* takes a critical look at these attempts to jettison existing social realities and offers a bold new approach for understanding the media environments to come.

Personal Stereo Rebecca Tuhus-Dubrow, 2017-09-07. *Object Lessons* is a series of short beautifully designed books about the hidden lives of ordinary things. When the Sony Walkman debuted in 1979, people were enthralled by the novel experience it offered: immersion in the music of their choice, anytime, anywhere. But the Walkman was also denounced as self-indulgent and antisocial, the quintessential accessory for the me generation. In *Personal Stereo*, Rebecca Tuhus-Dubrow takes us back to the birth of the device, exploring legal battles over credit for its invention, its ambivalent reception in 1980s America, and its lasting effects on social norms and public space. Ranging from postwar Japan to the present, Tuhus-Dubrow tells an illuminating story about our emotional responses to technological change. *Object Lessons* is published in partnership with an essay series in *The Atlantic*.
