Applying the Dreyfus and Dreyfus Model in Different Fields will fill a unique niche in the field of adult higher and workforce education. This book will present examples of the application of the Dreyfus and Dreyfus model in different fields, i.e. health care, education, law, enforcement, business, serious gaming, military, ethics, training, etc., providing insight into how practitioners can develop their skills in their particular domains and how educators can promote this development. This collection will be appropriate for a wide variety of professors, researchers, practitioners, and students in the field of adult higher and workforce education.

This book builds on the expanding knowledge of what works in classrooms and suggests approaches that can open up individual and group possibilities for science and mathematics instruction.
