Handbook of Research on Engineering Education in a Global Context Smirnova, Elena V., Clark, Robin P., 2018-08-31
Engineering education methods and standards are important features of engineering programs that should be carefully designed both to provide students and stakeholders with valuable active integrated learning experiences and to provide a vehicle for assessing program outcomes. With the driving force of the globalization of the engineering profession, standards should be developed for mutual recognition of engineering education across the world, but it is proving difficult to achieve. The Handbook of Research on Engineering Education in a Global Context provides innovative insights into the importance of quality training and preparation for engineering students. It explores the common and current problems encountered in areas such as quality and standards management, information systems innovation, and enhanced learning technologies in education, as well as the challenges of employability, entrepreneurship, and diversity. This publication is a vital reference source for science and engineering educators, engineering professionals, and educational administrators interested in topics centered on the education of students in the field of engineering.

Handbook of Differential Equations: Evolutionary Equations C.M. Dafermos, Milan Pokorný, 2008-10-06
The material collected in this volume discusses the present as well as expected future directions of development of the field, with particular emphasis on applications. The seven survey articles present different topics in Evolutionary PDEs written by leading experts. Review of new results in the area. Continuation of previous volumes in the handbook series covering Evolutionary PDEs. Written by leading experts. WHO operational handbook on tuberculosis. Module 6 World Health Organization, 2025-01-09
Addressing comorbidities and risk factors for tuberculosis. TB is a crucial component of the World Health Organization's End TB Strategy. This WHO operational handbook on tuberculosis Module 6 tuberculosis and comorbidities aims to support countries in scaling up people-centred care based on the latest WHO recommendations on TB and key comorbidities and drawing upon additional evidence, best practices, and inputs from various experts and stakeholders obtained during WHO processes. It is intended for use by people working in ministries of health, particularly TB programmes, and the relevant departments or programmes responsible for comorbidities and health-related risk factors for TB, such as HIV, diabetes, undernutrition, substance use, and tobacco use, as well as programmes addressing mental health and lung health. This operational handbook is a living document and will include a separate section for each of the key TB comorbidities or health-related risk factors. The third edition includes guidance for HIV-associated TB, mental health conditions, and diabetes, which are three conditions strongly associated with TB.

and which result in higher mortality poorer TB treatment outcomes and negatively impact health related quality of life The operational handbook aims to facilitate early detection proper assessment and adequate management of people affected by TB and comorbidities Full implementation of this guidance is expected to have a significant impact on TB treatment outcomes and health related quality of life for people affected by TB

Design Strategies for Efficient and Sustainable Building Facilities González-Lezcano, Roberto Alonso, Sansaniwal, Sunil Kumar, 2024-08-05 Despite the growing emphasis on energy efficiency in building design our indoor environments often fall short of providing optimal conditions for health and well being Indoor air quality temperature and lighting levels play crucial roles in occupant health yet they are frequently

overlooked in building practices This oversight leads to environments that can harm health contributing to respiratory problems allergies and reduced productivity Design Strategies for Efficient and Sustainable Building Facilities offers a comprehensive solution We delve into recent advances in building design construction and operation that prioritize energy efficiency and occupant health By incorporating intelligent sensors automation systems and renewable energy sources like solar and wind power buildings can be transformed into healthy sustainable spaces that promote well being This book is tailored for researchers professionals university professors and master s and doctoral students who seek to advance sustainable building practices
