*Staff Study on New York State's Medicaid Program*, 1989      *McKinney's Consolidated Laws of New York Annotated* New York (State), 2010      **New York Politics** Edward V. Schneier, Brian Murtaugh, 2015-01-28 Most New Yorkers have very little knowledge of how influence is wielded in Albany. This acclaimed book offers a chance to look behind those closed doors. The authors, an Albany-based political scientist and a former State Assembly member, now joined by an expert on political blogging and networking, infuse their discussion of institutions and processes with the drama and significance of real power politics. Completely revised and updated with extensive new material, the book covers recent political developments and electoral contests as well as all the basics: constitutional issues, historical economic, social, and demographic factors, the functioning of executive, legislative, and judicial institutions, urban, local, and special district governments, parties, interest groups, and bureaucracies, and finance, budgets, health, education, and welfare programs. Throughout, the authors are attentive to the many paradoxes and dualities that distinguish political, social, and economic life in the Empire State.      **New York State Comptroller's Annual Report of the Results of Audits at State Agencies and Public Authorities** New York (State). *Making Eye Health a Population Health Imperative* National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on Public Health Approaches to Reduce Vision Impairment and Promote Eye Health, 2017-01-15 The ability to see deeply affects how human beings perceive and interpret the world around them. For most people, eyesight is part of everyday communication, social activities, educational and professional pursuits, the care of others, and the maintenance of personal health, independence, and mobility. Functioning eyes and vision system can reduce an adult's risk of chronic health conditions, death, falls, and injuries, social isolation, depression, and other psychological problems. In children, properly maintained eye and vision health contributes to a child's social development, academic achievement, and better health across the lifespan. The public generally recognizes its reliance on sight and fears its loss, but emphasis on eye and vision health in general has not been integrated into daily life to the same extent as other health promotion activities, such as teeth brushing, hand washing, physical and mental exercise, and various injury prevention behaviors. A larger population health approach is needed to engage a wide range of stakeholders in coordinated efforts that can sustain the scope of behavior change. The shaping of socioeconomic environments can eventually lead to new social norms that promote eye and vision health. *Making Eye Health a Population Health Imperative: Vision for Tomorrow* proposes a new population-centered framework to guide action and coordination among various and sometimes competing stakeholders in pursuit of improved eye and vision health and health equity in the United States. Building on the momentum of previous public health efforts, this report also introduces a model for action that highlights different levels of prevention activities across a range of stakeholders and provides specific examples of how population health strategies can

be translated into cohesive areas for action at federal state and local levels Active Projects Report ,1998
