The digital age has had a profound effect on our cultural heritage and the academic research that studies it. Staggering amounts of objects, many of them of a textual nature, are being digitised to make them more readily accessible to both experts and laypersons. Besides a vast potential for more effective and efficient preservation management and presentation, digitisation offers opportunities to work with cultural heritage data in ways that were never feasible or even imagined. To explore and exploit these possibilities, an interdisciplinary approach is needed, bringing together experts from cultural heritage, the social sciences and humanities on the one hand, and information technology on the other. Due to a prevalence of textual data in these domains, language technology has a crucial role to play in this endeavour. Language technology can break through the Google barrier by offering the potential to analyse texts at advanced levels, extracting information and knowledge at the level of the humanities or social sciences researcher who wants to know about the who, what, where, and when, but also the how and the why. At the same time, cultural heritage data poses considerable challenges for existing language technology. Technology aimed at generic language has to face such disparate problems as historical language variation, OCR digitisation errors, and near-extinct academic expertise. This book is primarily intended for researchers in information technology and language processing who would like to receive a state-of-the-art overview of the whole breadth of the new and vibrant field of language technology for cultural heritage and its associated academic research in the humanities and social sciences. Researchers working in the target domains of cultural heritage, the social sciences and humanities will also find this book useful as it provides an overview of how language technology can help them with their information needs. The book covers applications ranging from pre-processing and data cleaning to the adaptation and compilation of linguistic resources to personalisation, narrative analysis, visualisation, and retrieval.

*Elizabethan Diplomacy and Epistolary Culture* Elizabeth R. Williamson,2021-05-23 A new account of Elizabethan diplomacy with an original archival foundation this book examines the world of letters underlying diplomacy and political administration by exploring a material text never before studied in its own right the diplomatic letter book Author Elizabeth R Williamson argues that a new focus on the central activity of information gathering allows us to situate diplomacy in its natural context as one of several intertwined areas of crown service and as one of the several sites of production of political information under Elizabeth I Close attention to the material features of these letter books elucidates the environment in which they were produced copied and kept and exposes the shared skills and practices of diplomatic activity domestic governance and early modern archiving This archaeological exploration of epistolary and archival culture establishes a m tier of state actor that participates in even defines a notably early modern growth in administration and information management Extending this discussion to our own conditions of access a new parallel is drawn across two ages of information obsession as Williamson argues that the digital has a natural place in this textual history that we can no longer ignore This study makes significant contributions to epistolary culture diplomatic history and early modern studies more widely by showing that understanding Elizabethan diplomacy takes us far beyond any single ambassador or agent defined as such it is a way into an entire administrative landscape and political culture      *International Aerospace Abstracts* ,1997      *Archaeological Concepts for the Study of the Cultural Past* Alan P. Sullivan,2008 An assembly of rhetoric on the tension between archaeology and cultural anthropology the former often considered merely a sub field of the latter and an examination of the degree to which the relationship between the two studies may have actually inhibited archaeological investigations
