Evaluating the Responsibility to Protect Noële Crossley, 2016-03-31 This book evaluates the extent to which the Responsibility to Protect

R2P has consolidated as a norm in international society A consolidated norm in international society is defined here as a regularised pattern of behaviour that is widely accepted as appropriate within a given social context The analysis is based on the assumption that the R2P could be regarded as a consolidated norm if it were applied consistently when genocide and other mass atrocities occur and if international responses routinely conformed to the core principles inherent in the R2P seeking government consent multilateralism prevention and regionalism This book employs Finnemore and Sikkink's norm lifecycle model to determine the putative norm's degree of consolidation with in depth case studies of the international responses to crises in Darfur and Kenya serving to illuminate the findings It advances the argument that whilst the R2P had fully emerged as a prospective norm by 2005 it has not yet fully consolidated as an international norm The R2P has been remarkably successful at pervading the international discourse but has been somewhat less successful at consistency in implementation in terms of adherence to its core principles as outlined above the qualitative dimension of the R2P

Furthermore it has been least successful to date in terms of consistency across cases in terms of resolve and tenacity The volume concludes with a reflection on the norm's progress so far and its prospects for further consolidation assuming the R2P continues on its current trajectory This book will be of much interest to students of the Responsibility to Protect humanitarian intervention international law security studies and IR

Trust beyond Borders Markus M. L. Crepaz, 2010-04-23 Will immigration undermine the welfare state *Trust beyond Borders* draws on public opinion data and case studies of Germany Sweden and the United States to document the influence of immigration and diversity on trust

reciprocity and public support for welfare programs Markus M L Crepaz demonstrates that we are at least in some cases capable of trusting beyond borders of expressing faith in our fellow humans and extending help without regard for political classifications In Europe the welfare state developed under conditions of relative homogeneity that fostered high levels of trust among citizens while in America anxiety about immigration and diversity predated the emergence of a social safety net Looking at our new era of global migration Crepaz traces the renewed debate about us versus them on both sides of the Atlantic and asks how it will affect the public commitment to social welfare Drawing on the literatures on immigration identity social trust and the welfare state Trust beyond Borders presents a novel analysis of immigration s challenge to the welfare state and a persuasive exploration of the policies that may yet preserve it Crepaz contributes much to our knowledge about the link between immigration and social welfare certainly one of the central issues in current national and international politics Stuart Soroka Associate Professor of Political Science and William Dawson Scholar McGill University Finally A book that challenges the growing view that ethnic diversity is the enemy of social solidarity It addresses an issue of intense debate in Western nations it takes dead aim at the theoretical issues at the center of the controversy it deploys an impressive array of empirical evidence and its conclusions represent a powerful corrective to the current drift of opinion Trust beyond Borders will rank among the very best books in the field Keith Banting Queen s Research Chair in Public Policy Queen s University Do mass immigration and ethnic diversity threaten popular support for the welfare state Trust beyond Borders answers no Marshaling an impressive array of comparative opinion data Crepaz shows that countries with high levels of social trust and universal welfare state arrangements can avoid the development of the welfare chauvinism that typically accompanies diversity Gary Freeman Professor and Department Chair Department of Government University of Texas at Austin Markus M L Crepaz is Professor in the Department of International Affairs at the University of Georgia and Associate Director of the Center for the Study of Global Issues GLOBIS

Rights Beyond Borders Rosemary Foot, 2000 Over the five decades since the establishment of the UN Charter and Universal Declaration of Human Rights human rights issues have become a dominant feature of the international system embracing new actors eroding the traditional Westphalian concept of sovereignty and leading to an acceptance that the treatment of individuals and groups within domestic societies is legitimately a focus of global attention This book examines the effect of this normative evolution on the individual state institutional and advocacy network behaviour Having described this normative environment it assesses its impact on key actors relationships with China particularly in the period since the Tiananmen bloodshed in June 1989 It also examines China s responses international and internal to being the focus of global attention in this issue area The book s theoretical concerns are to uncover the mechanisms through which international human rights norms influence especially the external but also the domestic behaviour of states

political science and related political practice They provide new evidence of the breadth of this contribution and its policy impact Rather than offering another account of the problem of gender inequality in the discipline the book focuses on the positive contribution of gender innovation It highlights in a systematic and in depth way how gender innovation has contributed to sharpening the conceptual tools available in different subfields including international relations and public policy At the same time the authors show the limits of impact in core areas of an increasingly pluralised discipline This volume will appeal to scholars and students of political science and international relations
