Reading on the Edge Cyraina E. Johnson-Roullier, 2000-05-18 Reading on the Edge explores the notion of multiple cultural identity and exile in the work of Marcel Proust James Joyce and James Baldwin Focusing on the cultural politics of modernism through the prism of cultural theory the book reconceives each author's work while at the same time redrawing modernism's traditionally Eurocentric disciplinary boundaries The book therefore has wide implications for our understanding of modernism and the modernist canon *At Translation's Edge* Nataša Durovicova, Patrice Petro, Lorena

Edge Detection Methods Based on Generalized Type-2 Fuzzy Logic Claudia I. Gonzalez, Patricia Melin, Juan R. Castro, Oscar Castillo, 2017-03-05. In this book, four new methods are proposed. In the first method, the generalized type 2 fuzzy logic is combined with the morphological gradient technique. The second method combines the general type 2 fuzzy systems (GT2 FSs) and the Sobel operator. In the third approach, the methodology based on Sobel operator and GT2 FSs is improved to be applied on color images. In the fourth approach, we proposed a novel edge detection method where a digital image is converted to a generalized type 2 fuzzy image. In this book, it is also included a comparative study of type 1, interval type 2, and generalized type 2 fuzzy systems as tools to enhance edge detection in digital images when used in conjunction with the morphological gradient and the Sobel operator. The proposed generalized type 2 fuzzy edge detection methods were tested with benchmark images and synthetic images in a grayscale and color format. Another contribution in this book is that the generalized type 2 fuzzy edge detector method is applied in the preprocessing phase of a face recognition system where the recognition system is based on a monolithic neural network. The aim of this part of the book is to show the advantage of using a generalized type 2 fuzzy edge detector in pattern recognition applications. The main goal of using generalized type 2 fuzzy logic in edge detection applications is to provide them with the ability to handle uncertainty in processing real-world images, otherwise, to demonstrate that a GT2 FS has a better performance than the edge detection methods based on type 1 and type 2 fuzzy logic systems.
