math and science **Research in Young Children's Literacy and Language Development** Olivia N. Saracho, 2019-12-13

The importance of the early years in young children's lives and the rigid inequality in literacy achievement are a stimulating backdrop to current research in young children's language and literacy development. This book reports new data and empirical analyses that advance the theory of language and literacy with researchers using different methodologies in conducting their study with both a sound empirical underpinning and a captivating analytical rationalization of the results. The contributors to this volume used several methodological methods e.g. quantitative qualitative to describe the complete concept of the study, the achievement of the study and the study in an appropriate manner based on the study's methodology. The contributions to this volume cover a wide range of topics including dual language learners, Latino immigrant children, children who have hearing disabilities, parents and teachers' beliefs about language development, early literacy skills of toddlers and preschool children, interventions, multimodalities in early literacies, writing and family literacy. The studies were conducted in various early childhood settings such as child care, nursery school, Head Start, kindergarten and primary grades and the subjects in the studies represent the pluralism of the globe, a pluralism of language backgrounds, ethnicity, abilities and disabilities. This book was originally published as a special issue of *Early Child Development and Care*. Children at the Center Betty Bardige, Megina Baker, Ben Mardell, 2021-03-09

Children at the Center provides a closely observed account of a decade-long effort to reshape the scope, direction and quality of the Boston Public Schools' early childhood programs. Drawing on multiple perspectives and voices from the field, the authors highlight the reflective, collaborative, inquiry-driven approach undertaken by the program and share lessons learned. Boston Public Schools are recognized for embedding high-quality public preK programs in their system and achieving exceptional results. In this book, the authors outline the core principles that underlie the district's early childhood programs and explore the role of curriculum, professional development, coaching and data use in supporting these new initiatives. They show how the Boston Public Schools Department of Early Childhood was able to work with and against the constraints of the current accountability system to create a holistic, child-centered, play-based program that has had a significant impact in narrowing income-based learning gaps. Written in collaboration with the Department of Early Childhood Education, this account of creating successful preK programs in a diverse urban district will provide a valuable resource for practitioners engaged in similar work across the country. *Handbook of Early Literacy Research* Susan B. The Most Important Year Suzanne Bouffard,2017-09-05 An eye opening look inside pre K in America and what it will take to give all children the best start in school possible

At the heart of this groundbreaking book are two urgent questions What do our young children need in the earliest years of school and how do we ensure that they all get it

Cutting edge research has proven that early childhood education is crucial for all children to gain the academic and emotional skills they need to succeed later in life

Children who attend quality pre K programs have a host of positive outcomes including better language literacy problem solving and math skills down the line and they have a leg up on what appears to be the most essential skill to develop at age four strong self control

But even with this overwhelming evidence early childhood education is at a crossroads in America We know that children can and do benefit but we also know that too many of our littlest learners don't get that chance

millions of parents can't find spots for their children or their preschoolers end up in poor quality programs

With engrossing storytelling journalist Suzanne Bouffard takes us inside some of the country's best pre K classrooms to reveal the sometimes surprising ingredients that make them work and to understand why some programs are doing the opposite of what is best for children

It also chronicles the stories of families and teachers from many backgrounds as they struggle to give their children a good start in school
