International Practices to Promote Budget Literacy Harika Masud,Helene Pfeil,Sanjay Agarwal,Alfredo Gonzalez Briseno,2017-08-09 Budget literacy is defined as the ability to read decipher and understand public budgets to enable and enhance meaningful citizen participation in the budget process It is comprised of two main parts i a technical understanding of public budgets including familiarity with government spending tax rates and public debt and ii the ability to engage in the budget process comprising of practical knowledge on day to day issues as well as an elementary understanding of the economic social and political implications of budget policies the stakeholders involved and when and how to provide inputs during the annual budget cycle Given that no international standards or guidelines have been established for budget literacy education to date

this book seeks to address this gap by taking stock of illustrative initiatives promoting budget literacy for youth in selected countries. The underlying presumption is that when supply side actors in the budget process governments simplify and disseminate budget information for demand side actors citizens this information will then be used by citizens to provide feedback on the budget. However since citizens are often insufficiently informed about public budgets to constructively participate in budget processes one way to empower them and to remedy the problem of budget illiteracy is to provide budget literacy education in schools to youth helping them evolve into civic minded adults with the essential knowledge needed for analyzing their government's fiscal policy objectives and measures and the confidence and sense of social responsibility to participate in the oversight of public resources. This book elaborates on approaches learning outcomes pedagogical strategies and assessment approaches for budget literacy education and presents lessons that are relevant for the development improvement or scaling up of budget literacy initiatives.

The Royal Inscriptions of Amēl-Marduk (561-560 BC), Neriglissar (559-556 BC), and Nabonidus (555-539 BC), Kings of Babylon Frauke Weiershäuser, Jamie Novotny, 2020-11-08. Amēl Marduk 561-560 BC, Neriglissar 559-556 BC and Nabonidus 555-539 BC were the last native kings of Babylon. In this modern scholarly edition of the complete extant corpus of royal inscriptions from each of their reigns, Frauke Weiershäuser and Jamie Novotny provide updated and reliable editions of the texts. The kings of the Neo-Babylonian Empire left hundreds of official inscriptions on objects such as clay cylinders, bricks, paving stones, vases, and stelae. These writings, ranging from lengthy narratives enumerating the deeds of a monarch to labels identifying a ruler as the builder of a given structure, supplement and inform our understanding of the empire. Beginning with a historical introduction to the reigns of these three kings and the corpus of inscriptions, Weiershäuser and Novotny then present each text with an introduction, a photograph of the inscribed object, the Akkadian text in a newly collated transliteration, an English translation, catalogue data, commentary, and an updated bibliography. Additionally, Weiershäuser and Novotny provide new translations of several related Akkadian texts and chronicles. Featuring meticulous yet readable transliterations and translations that have been carefully collated with the originals, this book will be the standard edition for scholars and students of Assyriology, the Neo-Babylonian dialect, and the Neo-Babylonian Empire for decades to come.

Innovating in a Secret World Tina P. Srivastava, 2019-07-01. Our national security increasingly depends on access to the most sophisticated and advanced technology. Yet the next time we set out to capture a terrorist leader, we may fail. Why? The answer lies in a conflict between two worlds. One is the dynamic global commercial world with its thriving innovations. The other is the world of national security in which innovation is a matter of life or death. The conflict is about secrecy. *Innovating in a Secret World* is a detailed examination of the U.S. government and innovation landscapes and of the current trends in often secret national security-related research and development. R.D. Based on case studies, detailed research, and interviews with executives at Fortune 500s, startup entrepreneurs, and military directors and program managers, this accessible and timely book is a must read. Tina P. Srivastava evaluates whether the

strategy of technology innovation in the world of national security leaves certain innovations behind or unintentionally precludes certain classes of innovators from participating She identifies the unintended consequences and emergent behaviors of this conflict This examination unfolds in a complex dynamic system that includes the legal framework in which technology innovation must exist For more than a decade Srivastava has been on the front lines of cutting edge technology innovation She suggests focusing on an emerging class of R D strategy called open innovation a strategy that broadens participation in innovation beyond an individual organization or division traditionally assigned to perform R D activities Through compelling stories of commercial and early government applications she shows how open technology innovation strategies can enable accelerate and enhance technology innovation Successful incorporation of open innovation into the previously closed U S government R D landscape can yield profound benefits to both national security and global leadership

Space Warfare in the 21st Century Joan Johnson-Freese, 2016-11-08 This book examines the recent shift in US space policy and the forces that continually draw the US back into a space technology security dilemma The dual use nature of the vast majority of space technology meaning of value to both civilian and military communities and being unable to differentiate offensive from defensive intent of military hardware makes space an area particularly ripe for a security dilemma In contrast to previous administrations the Obama Administration has pursued a less militaristic space policy instead employing a strategic restraint approach that stressed multilateral diplomacy to space challenges The latter required international solutions and the United States subsequently even voiced support for an International Code of Conduct for Space That policy held until the Chinese anti satellite ASAT test in 2013 which demonstrated expanded Chinese capabilities This volume explores the issues arising from evolving space capabilities across the world and the security challenges this poses It subsequently discusses the complexity of the space environment and argues that all tools of national power must be used with some degree of balance toward addressing space challenges and achieving space goals This book will be of much interest to students of space policy defence studies foreign policy security studies and IR

The Liability of Internet Intermediaries Jaani Riordan, 2016-06-30 Internet intermediaries play a central role in modern commerce and society Although their economic and social importance is well recognised their legal liability remains poorly understood and until now no work has specifically addressed their legal responsibility for wrongdoing carried out by third parties using their facilities or platforms This work fills that gap by providing comprehensive coverage of the legal duties owed by intermediaries and the increasingly complex schemes that regulate their activities The first part of the work introduces the concept of an internet intermediary general doctrines of primary and secondary liability and the European enforcement regime The second part examines the liability of intermediaries in specific areas of law with a detailed analysis of the applicable liability rules and the major English case law and decisions of the Court of Justice that interpret and apply them The final part of the work provides guidance on remedies and limitations Written by an expert author from the intellectual

Reimagining the Judiciary Maria C. Escobar-Lemmon, Valerie J. Hoekstra, Alice J. Kang, Miki Caul Kittilson, 2022-01-13 This book examines the factors that facilitate the inclusion of women on high courts while recognizing that many courts have a long way to go before reaching gender parity Why did women start appearing on high courts when they did Where have women made the most significant strides To address these questions the authors built the first cross national and longitudinal dataset on the appointment of women and men to high courts In addition they provide five in depth country case studies us to unpack the selection of justices to high courts in Canada Colombia Ireland South Africa and the United States The cross national lens and combination of quantitative analyses and detailed country studies examines multiple influences across region and time Focusing on three sets of explanations pipelines to high courts domestic institutions and international influences analyses reveal that women are more likely to first appear on their country s high court when traditional ideas about who can and should be a judge erode In some countries international treaties regional emulation and women s international NGOs play a role in disseminating and linking global norms of gender equality in decision making Importantly while informal institutions and reliance on men dominated networks can limit access women are making substantial strides in their countries highest courts where the supply grows and often where selectors have incentives to select women Further sustained pressure from advocacy organizations at the local national and global levels contributes to some gains Comparative Politics is a series for researchers teachers and students of political science that deals with contemporary government and politics Global in scope books in the series are characterized by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.ecprnet.eu The series is edited by Susan Scarrow John and Rebecca Moores Professor of Political Science at the University of Houston and Jonathan Slapin Professor of Political Institutions and European Politics Department of Political Science University of Zurich

A Model Civil Procedure Code for England and Wales John Sorabji, 2024-10-14 Civil procedure law is integral to our understanding of access routes to justice dispute resolution and ultimately the rule of law However the field is rapidly changing shifting dispute resolution away from courts and judgments towards other legal pathways such as negotiation mediation arbitration and Ombudsman Similarly the increasing digitisation of society and looming potential of AI will profoundly influence future reforms Civil justice is thus at a critical turning point In response John Sorabji proposes a new model civil procedure code for England and Wales Building on the work of the ALI UNIDROIT Principles of Transnational Civil Procedure and the ELI UNIDROIT Model European Rules of Civil Procedure he articulates a simplified principle based seventeen part approach that covers all major stages from issue to enforcement with sections on costs and funding provisional measures access to evidence and privileges case statements hearings and dispute management Highlighting that civil courts are just one part of a wider civil justice ecosystem Sorabji

promotes the wealth of avenues available for dispute resolution and charts how these should be co-ordinated in the future. He outlines new ways to efficiently incorporate breakthroughs in digitisation and preventive and consensual forms of justice and also explores likely shifts in the purpose of procedural codes as digitisation evolves while underscoring the consistent need for judicial independence and accountability. Ultimately Sorabji posits that procedural codes should guide not only the process of litigation but those who design digital procedures and test their propriety in the future. **The Routledge**

Companion to Accounting and Risk Margaret Woods, Philip Linsley, 2017-03-27 To date there has been little consideration of the many different ways in which accounting and risk intersect despite organisations being more determined than ever to build resilience against potential risks. This comprehensive volume overcomes this gap by providing an overview of the field drawing together current knowledge of risk in a wide range of different accounting contexts. Key themes such as corporate governance, trust, uncertainty and climate change are covered by a global array of contributing scholars. These contributions are divided into four areas: The broader aspects of risk and risk management; Risk in financial reporting; Risk in management accounting; Risk monitoring. The book is supported by a series of illustrative case studies which help to bring together theory and practice. With its wealth of examples and analyses, this volume provides essential reading for students, scholars and practitioners charged with understanding diverse facets of risk in the context of accounting in the business world.
