Assessment in the Second Language Writing Classroom Deborah Crusan, 2010-07 Assessment in the Second Language Writing Classroom is a teacher and prospective teacher friendly book uncomplicated by the language of statistics. The book is for those who teach and assess second language writing in several different contexts: the IEP, the developmental writing classroom, and the sheltered composition classroom. In addition, teachers who experience a mixed population or teach cross-cultural composition will find the book a valuable resource. Other books have thoroughly covered the theoretical aspects of writing assessment, but none have focused as heavily as this book does on pragmatic classroom aspects of writing assessment. Further, no book to date has included an in-depth examination of the machine scoring of writing and its effects on second language writers. Crusan not only makes a compelling case for becoming knowledgeable about L2 writing assessment but offers the means to do so. Her highly accessible, thought-provoking presentation of the conceptual and practical dimensions of writing assessment, both for the classroom and on a larger scale, promises to engage readers who have previously found the technical detail of other works on assessment off-putting as well as those who have had no previous exposure to the study of assessment at all.

Psychology Research Methods Wendy Heath, 2024-11-18 The second edition of *Psychology Research Methods: How to Think About and Write About Research* by Wendy Heath engages students with compelling studies relevant to students' lives but in a research methods context. By looking underneath the conclusions of these studies to determine which methods they use, students discover the relevance and importance of research methods. Heath also focuses on writing about research methods by presenting examples from across psychology literature as well as writing exercises at the end of each chapter. These features help students complete their research papers with confidence while gaining a greater understanding of research methods through writing. Coverage of descriptive, experimental, quasi-experimental, small N design, and qualitative methods in psychology give students a broad overview of all
